

Immunization Clients with Private Insurance

Please be aware that beginning March 1, 2013, our office can no longer cover the cost of co-pays or deductibles that your insurance does not pay.

What does this mean for you?

We will need to ask you some questions about your insurance, and our billing department will need to research your coverage before we provide immunizations for you.

At times you may have to wait up to two days for us to get this information and schedule you an appointment.

Once we have the insurance information we will inform you about your best option for getting your vaccines.

Some insurance plans will pay the health department the entire cost for vaccinating you or your child. Others will often pay part of the cost and some may not pay anything.

Options you have for receiving vaccines

1. Make an appointment with your physician if you are an enrolled client. This usually costs you nothing or very little.
2. Pay full price for your immunizations at the health department; then seek reimbursement from your insurance carrier.
3. Go through the health department screening process for insurance coverage. Then work with us to decide your best option for receiving vaccines.

If you do not have a doctor

Marion and Polk Medical Society provides a website that helps people to find area doctors accepting new clients. We can show you how to use this website. The webpage is:

<http://www.mpmedsociety.org/index.php?content=doctorsearch>

If you need assistance navigating through the website, feel free to call (503) 361-2791.

Marion County Health Department has also compiled a list of insurance companies. They can often provide clients with a list of providers that may be taking new clients. If you don't have a doctor and have one of the

following insurance companies, click on the site or call the customer service number to obtain a list of doctors taking new clients.
