Junction box installation and sidewalk ramp replacement on Buffalo Drive SE may impact traffic

SALEM, OR – Marion County’s contractor Gelco Construction is scheduled to begin construction the week of July 8, 2019, to upgrade the stormwater system at 4868 Buffalo Drive SE. The construction will include installing a new junction box and replacing a sidewalk ramp with one that meets the standards of Americans with Disabilities Act (ADA).

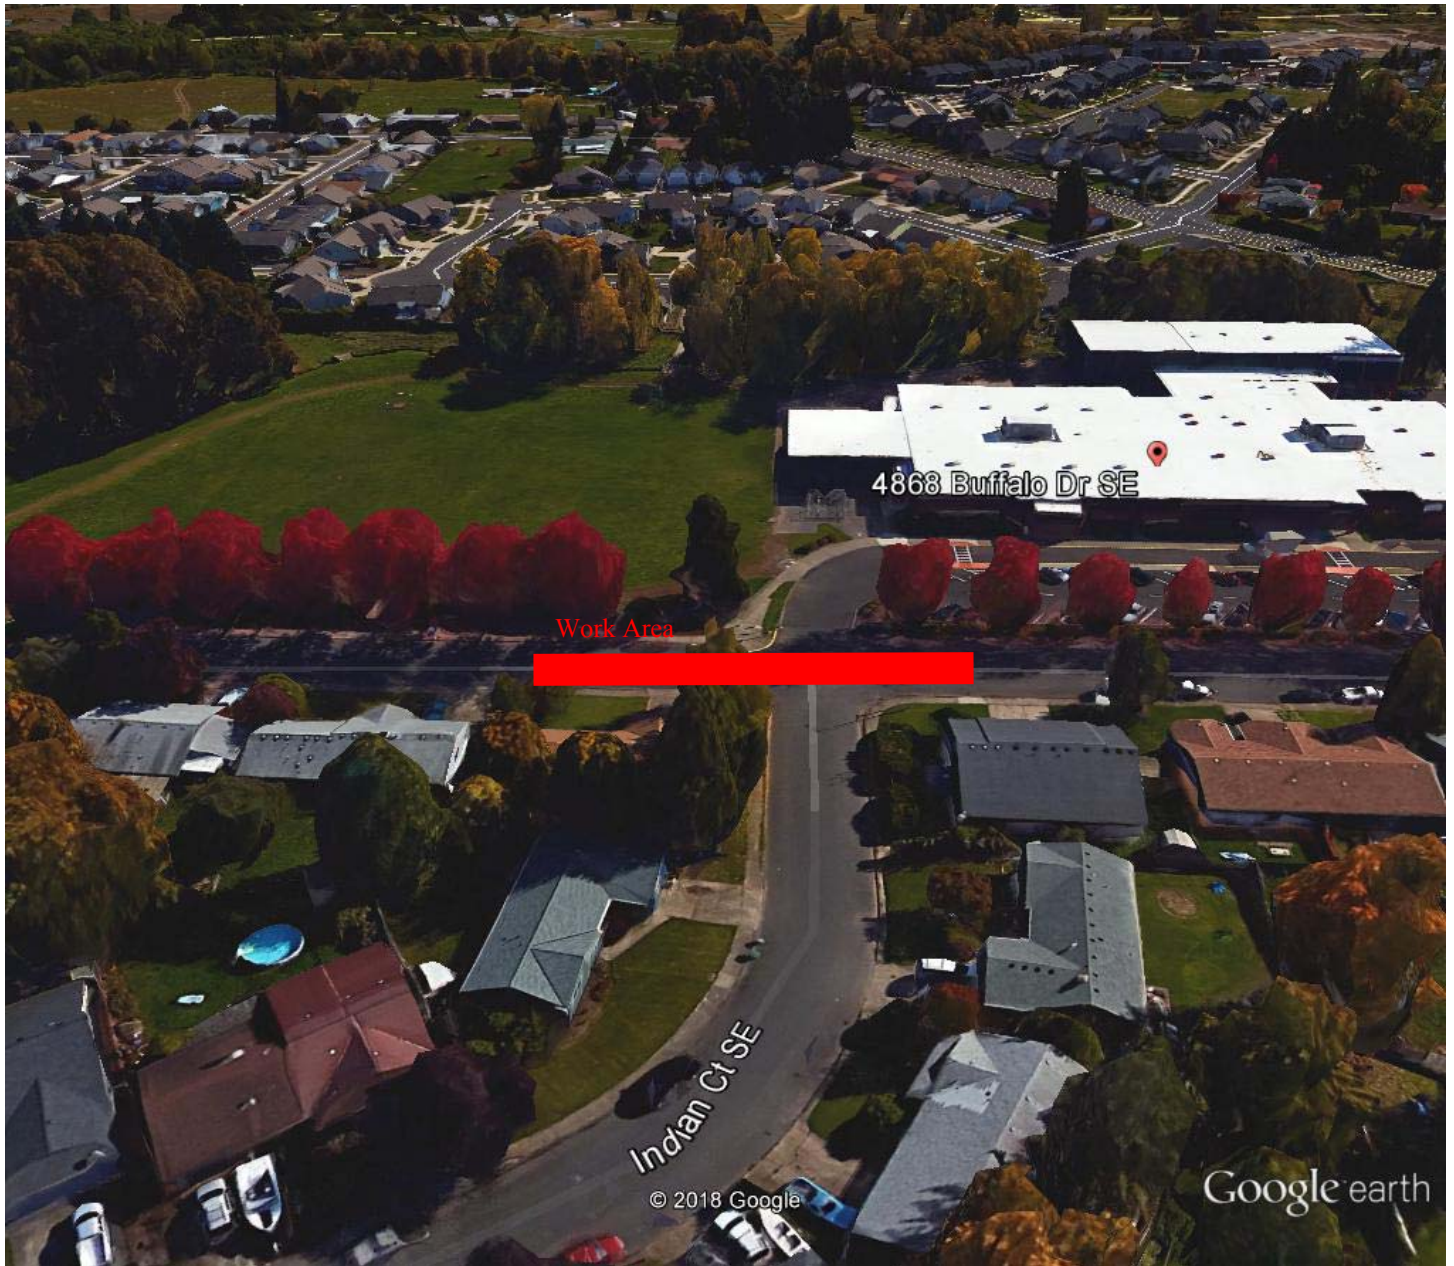

Access for pedestrians, including those with disabilities, will be available and identified through or around the work area during construction.

Buffalo Drive will remain open with flaggers directing traffic through the work area. Motorists may experience short delays and are advised to use an alternative route when possible. When traveling through the work zone, please be considerate of bicyclists and follow the flagger’s directions.

For the most current information visit Marion County’s web site at:
