Executive Summary

On March 11, 2021, the American Rescue Plan Act was signed into law, and established the Coronavirus State and Local Fiscal Recovery Funds (SLFRF) program. This program, according to federal guidelines, is intended to provide support to state, territorial, local, and Tribal governments in responding to the economic and public health impacts of COVID-19 and in their efforts to contain impacts on their communities, residents, and businesses. The U.S. Department of Treasury (Treasury) is overseeing the transmission and compliance of these funds for state, local, and Tribal governments.

The guidance and reporting requirements for the SLFRF program were released on June 24, 2021. These guidelines established the need for various reporting requirements, including an Interim Report, quarterly Project and Expenditure Reports, and annual Recovery Plan Performance Reports. The Recovery Plan Performance Report each year will provide the public and Treasury information on the projects the county is undertaking with program funds and how the county is planning to ensure program outcomes are achieved in an effective, efficient, and equitable manner, with complying with key performance and mandatory indicators identified by Treasury. This Recovery Plan Performance Report covers the period from July 1, 2021, to June 30, 2022. This and subsequent annual reports will describe the county's efforts to direct these funds, provide status updates for each awarded project, and comply with federal reporting requirements.

Marion County has been allocated \$67,559,569 in State and Local Fiscal Recovery Funds. Marion County received its first distribution in June 2021, in the amount of \$33,779,784.50. The second distribution of the same amount was received in June 2022. The Governing Body for the County is the Board of Commissioners (Board) consisting of three county commissioners elected at-large. During the summer and fall of 2021, the Board, policy analysts, and Economic & Community Development staff met with 14 of 20 cities in Marion County to collect input from the public, documented the priorities of the local municipalities, and collected additional data to identify where the needs were most prominent. The priorities within the county were based on these findings, as well as thorough evaluation of available data on the inequitable impact of the Pandemic on various regions in the county. The county's efforts mirror those established by the American Rescue Plan Act to help aid the county in economic recovery and bolster public health, as well as allocate a large portion of the funds to generational infrastructure investments within the community. Marion County has more cities than any other county in Oregon and investing in those cities was a Board priority.

Based on the Board's meetings and discussions with local communities, an application process was determined the best way to prioritize and utilize the SLFRF funding. Applications were solicited, received, and reviewed for eligibility by a review committee in late 2021. The review committee presented the applications to the Board during an official work session and the Board approved and awarded a list of eligible projects in the spring of 2022. Over 85% of the county's entire allocation was awarded in Round-1 of the application process, with the majority awarded to public infrastructure. The county developed subrecipient and beneficiary agreements for the various awards and is currently in the process of executing the agreements. A second round of applications was solicited to allocate the remainder of the funds received by the county. The county anticipates that Round-2 agreements will be fully executed by the Fall of 2022. The county is on track to have the entire SLFRF allocation obligated by December 31, 2024, and expended by December 31, 2026, in compliance with U.S. Treasury requirements.

Marion County hereby follows the objectives of the State and Local Fiscal Recovery Funds and will use funds to support urgent COVID-19 response efforts to continue to decrease spread of the virus and bring the Pandemic under control, strengthen support for vital public services and help retain jobs, support immediate economic stabilization for households and businesses, address

systemic public health and economic challenges that have contributed to the inequal impact of the Pandemic, and make generational improvements to the county and cities' infrastructure.

As described above, the Board developed a plan to address the needs of the community, as impacted by the COVID-19 pandemic, based on broad input received at a series of public meetings. This strategy follows the overarching guidelines of the American Rescue Plan Act (ARPA) and requirements of SLFRF Funds, which includes the following eligible categories for funding:

- a. Public Health (EC 1)
- b. Negative Economic Impacts (EC 2)
- c. Public Health-Negative Economic Impact: Public Sector Capacity (EC 3)
- d. Premium Pay (EC 4)
- e. Water, sewer, and broadband infrastructure (EC 5)
- f. Revenue Replacement (EC 6)
- g. Administrative (EC 7)

The COVID-19 Pandemic has had far-reaching health and economic impacts in the county. These impacts have yet to be fully enumerated. Since the beginning of the Pandemic, Marion County has reported 70,376 confirmed COVID-19 cases, as of May 10, 2022.¹ The economic impacts of the pandemic have been identified as part of this Recovery Plan prioritization process.

As detailed in the next section, this report outlines the use of funds from July 1, 2021, through June 30, 2022. In addition, Attachment B displays a GIS map of the awarded projects as of June 30, 2022. This map will be made available to the public on the county's website and provide the status of each project through completion.

This report and subsequent reports will describe the on-going efforts as the county allocates funding to address community needs, including an equitable recovery in the county.

Uses of Funds

The following section describes the county's use of funds as of June 30, 2022. The use of funds will be described within each of the funding categories, as established by federal reporting guidelines in the Treasury's SLFRF Compliance and Reporting Guidance. Future projects will be described in subsequent reports. This section will also be used to describe other county efforts to help mitigate the impacts of the COVID-19 Pandemic.

Note: projects with an asterisk (*) have been awarded, however, the agreements have not been fully executed as of June 30, 2022, as the county is still working through the final signature process. These agreements are expected to be fully executed by the next Project and Expenditure quarterly reporting period. Projects that are fully executed and have current expenditures are listed in the Project Inventory section of this report.

Public Health (EC 1)

Marion County has obligated \$9,790,447 towards Public Health projects as of this reporting period. These projects include:

- Marion County Public Works Department (Department) - Emergency Radio Communication System for \$9,000,000. This project will construct a new public safety radio system network serving Sheriff's Office, police, fire, and ambulance emergency districts throughout Marion

¹ <https://www.co.marion.or.us/HLT/COVID-19/Documents/Marion%20County%20COVID-19%20Data%20and%20Trends%20-%2008112021.pdf>

County. The resulting fully operable Radio Frequency (RF) and microwave broadband communications network will fully comply with FCC public safety radio standards. The system will be managed and maintained by Public Works as a long-term service to the county and emergency organizations.

- Marion County COVID-19 Emergency Paid Sick Leave for \$790,447. The Board of Commissioners approved an order to provide temporary benefits to employees, who were directed by the Local Public Health Authority to quarantine resulting from a positive COVID-19 test or direct exposure to COVID-19. County employees received up to two weeks of leave time to safely isolate or quarantine, effective 7/1/21 through 6/30/22. SLFRF funds were used to offset the cost of providing this benefit. See the Project Inventory section for more information on this project.

Negative Economic Impacts (EC 2)

Marion County has obligated \$6,650,262 to Negative Economic Impact projects as of this reporting period. These projects include:

- Woodburn Marion-Polk Food Share Rebuilding Award Food Bank for \$750,000. The project includes reconstruction of the food bank after a fire destroyed the existing structure in August of 2021. The food bank is in a Qualified Census Tract and serves approximately 9,000 food insecure individuals annually in Woodburn, the third largest city in Marion County. See the Project Inventory section for current expenditures to date.
- City of Keizer Athletic Fields project at Keizer Rapids Regional Park for \$2,000,000*. The total project is estimated to cost \$4,200,000. The project includes the addition of two all-weather multi-use sports fields that support activities such as soccer, rugby, football, and lacrosse. The fields would be available year-round to serve the residents of Keizer, Salem, Marion County, and others due to the regional nature of this park. The City will be using the SLFRF grant funds awarded by the county, the city's own SLFRF funding, Parks System Development Charges (SDC's), and volunteer efforts to complete the project.
- Marion County Public Works Department Parkdale Park Development project in the East Salem unincorporated area for \$364,854. The project will develop a unique neighborhood park that provides residents with increased access to outdoor green space, improve stormwater infrastructure, and increase educational opportunities for children to learn about wetlands and nature through interactive play and interpretive features. New amenities will include a new parking area, ADA accessible pathways, an ADA accessible restroom, a fenced dog park, a wetland-themed nature play area, and a wetland interpretive walkway. The project will also mitigate .35-acres of wetland disturbance to provide increased stormwater retention, enhanced wildlife habitat, increased biodiversity, improve water quality, and provide educational opportunities and green space for residents.
- HOPE Pregnancy Clinic for \$285,408 for Assistance to Impacted Nonprofit Organizations. The project was approved to reimburse the beneficiary for costs associated with remodeling the Parenting Annex Building to provide additional space to adhere to the COVID-19 pandemic social distancing requirements and to stay open and serve patients through the pandemic. A remodel of the space was needed to make the space usable for the services they provide. Without this additional space, the Beneficiary would not have been able to

continue serving the number of disproportionately impacted patients requesting their services. See the Project Inventory section for current expenditures to date.

- City of Salem Navigation Center project in Salem for \$3,000,000*. The project includes the renovation of an existing building owned by the City of Salem to serve as a navigation center for unsheltered individuals in the community. The facility will include office and conference room space for administrative staff and case managers, sleeping quarters, restrooms, showers, a laundry facility, a kitchen and dining area, and a day use area for residents. The City will be using the SLFRF grant funds to pay for mechanical, electrical, plumbing, fire sprinkler system upgrades, and other equipment.
- City of Silverton Transitional Housing and Homeless Resource Center for \$250,000*. This project will provide resources to assist unhoused individuals in the community work towards permanent housing. The project includes the purchase of a modular building for resources and case management services, four pallet shelters will be erected as transitional housing, utilities will be run to site, and fencing will be installed for security.

Premium Pay (EC 4)

- Marion County approved \$2,772,559 in one-time Pandemic Relief Pay to recognize work performed by county employees to maintain public services during the declared emergency due to COVID-19 pandemic. See the Project Inventory section for more information.

Water, sewer, and broadband infrastructure (EC 5)

Marion County has obligated public infrastructure projects equaling \$26,498,000. These projects include:

- City of Aumsville Wastewater Treatment System project for \$1,000,000*. The project's first stage is the design and engineering of the wastewater facility, which is within the city's current property boundaries.
- City of Aurora Downtown Water Line project for \$1,000,000*. The project includes the replacement of water lines along Main Street NE, from First Street to Ottaway Road. The existing line is comprised of 6" to 8" asbestos cement, steel, and PVC pipes. These will be replaced by 2,520 lineal feet of 8" water line and 850 lineal feet of a 12" water line. In addition, approximately 1,460 lineal feet of 2" galvanized steel water line along Highway 99E from Third Street to Bob's Avenue will be replaced with 1,460 lineal feet of a 10" water line.
- City of Donald Water Drinking Wells project for \$1,000,000*. This project includes the development of a new drinking water well (#3) to provide additional water source for increased supply and redundancy. Additional aspects of this project include Water Treatment Plant upgrades: electrical service, replacing chemical storage tank and feed pump, and replacing the standby generator.
- City of Gates Water Systems Improvement Project for \$1,000,000*. This project includes the replacement and relocation of several substandard and failing water mains in various locations throughout town with 8" water mains to provide greater flow capacity. The City of

Gates will be using the SLFRF grant funds to pay for the replacement of the water mains that are failing.

- City of Gervais Municipal Wastewater project for \$1,000,000*. The City's wastewater lagoon and the pump station need an upgraded aeration system, transfer pump and force main to increase capacity and reliability on the City's wastewater treatment plant system.
- City of Hubbard Water System Improvements project for \$1,000,000*. Phase 1 of water system improvements that will help preserve existing infrastructure assets, improve public safety, and accommodate anticipated community growth (design, permitting, and construction).
- City of Jefferson Water Treatment Plant project for \$450,000*. The project will include engineering, design, and construction of an excess recirculation system that will re-filter water and increase the operating efficiency of the water treatment plant.
- City of Mill City Wastewater Sewer Improvement project for \$1,000,000*. Project includes improvements to the existing system to address operational issues as well as provide additional retention and treatment to accommodate residential and commercial growth during the next 5 to 10 years as an interim solution to a larger sewer system upgrade.
- City of Mt. Angel Sanitary Sewer Trunk Line project for \$450,000*. Project will improve the City's current sanitary sewer system by replacing the existing trunk sewer main with 1,760 lineal feet of 18" to 24" pipe, which will double the capacity of the system.
- City of St. Paul Water Systems Improvement project for \$1,000,000*. Project includes many improvements designed to expand and enhance the City's potable drinking water service delivery. The project includes the replacement and upsizing of various water lines, the replacement of valves to isolate portions of the system, and the construction of a new 500,000-gallon above ground water reservoir to stabilize water supply with demand and enhance pressures throughout the system.
- City of Stayton 30" Sanitary Pipe Construction project for \$500,000*. Project will upsize an existing pipe from 21" diameter to 30" diameter from Jetters Way, from a manhole located adjacent to the Stayton Fire District building to a manhole in front of 1207 Ida Street.
- City of Sublimity Water System Improvements project for \$1,000,000*. Project replaces an aging 500,000-gallon water storage tank with a 750,000-gallon water storage tank for needed capacity improvements to meet the anticipated 20-year population growth projection. This project will also add SCADA system improvements that will allow the City's water wells to interact more efficiently and reduce staff time.
- City of Turner Water Booster Pump Stations project for \$200,000*. Project will provide permanent housing for a booster pump station and implements necessary algal toxin safeguards on the system to ensure safe drinking water can continue to be provided to Turner residents.
- City of Turner Storm Drain project for \$450,000*. The infrastructure in the Denver Street SE, Chicago Street SE, Boise Street, and the outfall to Mill Creek is undersized and regularly

results in flooding several busy city intersections during any heavy rainfall. This project will study the stormwater basin, design enhancements to the system to alleviate this flooding, and construct the resulting solution.

- Marion County Public Works Department - Brooks Service District wastewater project for \$5,000,000. This project expands the existing sewer plant to provide the processing capacity needed to accommodate the increased sewer flow and concentration of an expanded waste collection system, including the construction of a pump station, manholes, and new gravity and pressure main connections.
- Marion County Public Works Department - Brooks Service District Drinking Water project for \$9,848,000. This project includes the installation of a new community water well, 500,000-gallon drinking water reservoir, booster pump station, water main, and service connections to replace the Chemeketa Community College water source.
- Marion County Public Works Department - Fargo Service District wastewater treatment facility project for \$600,000. This is the service district's portion of the overall larger City of Donald municipal wastewater treatment plant expansion project. The purpose of the project is to accommodate the population growth within the Fargo Interchange Service District, which is a special district formed and managed by Marion County to collect wastewater in the unincorporated area.

Revenue Replacement (EC 6)

Marion County has either obligated or set aside \$17,083,329 of the available \$20,248,071 calculated as revenue loss due to COVID-19 per the GFOA revenue replacement calculator. The County has approved the following projects as part of the revenue replacement category:

- Microsoft Office 365 software upgrade for \$3,602,029 to address cybersecurity countywide while also improving internal efficiency. See the Project Inventory section for current expenditures to date.
- Marion County Community Services Department - Detroit Marinas Excavation project for \$3,000,000. The project includes excavation of 162,000 cubic yards of sediment underneath the existing boat docks at Detroit Lake Marina and Kane's Marina at the Detroit Lake Reservoir to extend the reservoir use season that is vital to economic health of the community and businesses.
- Marion County Public Works Department - Lebrun Road Realignment project for \$1,000,000 to perform road work associated with realigning Lebrun Road and Railroad Crossing near Woodburn.
- Marion County Public Works Department - Stayton Wilderness and Riverfront Park project for \$1,000,000*. Project would reopen Wilderness Park by removing storm debris, installation of streambank for erosion mitigation, installation of signage and fencing, and other pedestrian improvements such as construction of a pedestrian bridge linking Wilderness Park to Riverfront Park.
- Marion County Health and Human Services Department - Our Place project for \$500,000. This project will provide on-site transitional housing for the Oregon Department of Human

Services Child Welfare which includes parenting mothers and fathers with substance use disorders who are pursuing long-term recovery to work toward regaining permanent custody of their children or reunifying with their children awaiting placement.

Administrative (EC 7)

U.S. Treasury allows recipients who are administering the SLFRF program to cover the costs associated with managing the programs and performing the required quarterly and annual reporting to Treasury and the public.

- Marion County has obligated \$3,377,978 of SLFRF funds, or 5% of the total award, for administrative costs associated with managing the Marion County ARPA/SLFRF program. See the Project Inventory section for current expenditures to date.

Other County Initiatives

In addition to these efforts, Marion County is providing emergency rental assistance using other federal funding resources. The Marion County Emergency Rental Assistance Program helps eligible low-income households with their past due rent and utilities. The program covers up to 12-months of past due rent and utilities and may pay up to three months of forward rent at a time, not to exceed a total of 18-months of assistance. Past due rent must be paid before future rent coverage is eligible. Utility costs include electricity, gas, home energy services, water, sewer, trash removal, and bulk fuels.²

Eligible landlords who participate in the Emergency Rental Assistance program can receive reimbursement for 100 percent of an eligible tenant's unpaid rent from April 1, 2020, to present for a total of 12 months.

Eligible tenants can apply for 100 percent of the past due rent from April 1, 2020, to present for a total of 12 months, which will be paid directly to their landlord. Eligible tenants can receive prospective (future) rental assistance equal to 100 percent of their monthly rent for up to three months at a time. Eligible tenants may also receive assistance for unpaid utility bills accumulated from April 1, 2020, to present. Unpaid utility bills will be paid directly to the utility company.

Marion County is also providing public health information, information about various federal and state resources for households and businesses, as well as a dashboard that provides current data the on the status of the pandemic throughout the county³. These efforts are being used to combat the spread of COVID-19 throughout the community.

Promoting Equitable Outcomes

Most of the identified projects in this current Recovery Plan Report are infrastructure related. As such, the Marion County Board of Commissioners were purposeful in allocating funds broadly throughout the county to provide benefits to as many residents as possible, see Attachment B.

Six of the awarded projects in this report are directly targeted at providing benefit for those who are historically underserved to promote an equitable recovery with a combined allocation of \$6,650,263. These projects specifically include:

² <https://www.co.marion.or.us/BOC/CD/Pages/rentalassistance.aspx>

³ <https://www.co.marion.or.us/HLT/COVID-19/Pages/default.aspx>

* Projects awarded, however, the agreements have not been fully executed as of 6/30/22, as the county is still working though the final signature process.

Project	\$ Obligated
Keizer Athletic Fields*	2,000,000
Marion-Polk Food Share Food Bank	750,000
Parkdale Park Development	364,854
Hope Pregnancy Clinic Annex	285,408
Salem Homeless Navigation Center*	3,000,000
Silverton Transitional Housing and Resource Center*	250,000
Total	6,650,263

These projects specifically address stabilizing the housing insecure, providing services to those who are food insecure, delivering counseling and treatment, and providing additional recreational opportunities to community members in underserved areas that have been disproportionately impacted by the pandemic.

The county will update this list in future reports if more projects are awarded to disproportionately impacted communities.

Community Engagement

Marion County has engaged in various public outreach efforts in relation to ARPA and SLFRF. These efforts, to date, have included county-wide outreach to local jurisdictions, non-profit organizations, and input from the public at large. The Marion County Board of Commissioners (Board) had dialogue with elected officials of cities throughout Marion County to gauge the impacts of the Pandemic along with the long/short range projects needed throughout the county. The projects awarded in Round-1 of funding for this report are directly related to the input received at those meetings, see Use of Funds section.

In addition, the Board had discussions with numerous nonprofit organizations who deliver services to disadvantaged and historically underrepresented persons throughout the county. Round-2 of funding will be directed toward satisfying the nonprofit needs and will be identified in subsequent reports.

The community engagement process in Marion County will be on-going throughout the use of these funds. In addition, the county will continue efforts to work closely with city officials, non-profits, and others to provide both opportunities to shape the priorities for these funds, as well as incorporate any feedback from the community.

Labor Practices

As of the date of this report, \$26,498,000 of infrastructure projects have been obligated, though work has not begun on any of them. Each infrastructure project awarded did not exceed \$10M in SLFRF funding. The county is committed to using equitable labor practices and included such language in the subrecipient agreements for all the infrastructure projects following the guidelines established by the State of Oregon Bureau of Labor and Industries (BOLI) Prevailing Wage Requirements as set forth Oregon Revised Statute (ORS) 279C.800 through 279C.870, and, as applicable, the requirements of Davis-Bacon Act. Compliance with these requirements will be overseen during the subrecipient monitoring and contract management process.

Use of Evidence

Marion County has awarded SLFRF Funds to several projects, however, most agreements have not been fully executed as of June 30, 2022, as the county is still working through the final signature process. These projects are expected to be fully executed by the next Project and

Expenditure quarterly reporting period. Projects that are fully executed are listed in the Project Inventory section of this report and will identify, as applicable, the amount of the project that has been allocated towards evidence-based intervention. At a minimum, the county will collect data on the following U.S. Treasury Required Performance Indicators where applicable and report the information in the Project Inventory section. See Performance Report section for awards that were made under expenditure categories that require performance indicators.

Performance Report

Marion County is aware of the required performance indicators and programmatic data that must be included as part of the reporting of the use of SLFRF funds. The county has incorporated into the subrecipient's quarterly reporting the collection of the mandatory required data which will be incorporated into the annual report in the project inventory section. The projects awarded that require programmatic and performance data are under the following expenditure categories:

- a) Negative Economic Impacts: Food Programs 2.1
- b) Negative Economic Impacts: Long-Term Housing Security: Services to Unhoused Persons 2.16
- c) Negative Economic Impacts: Economic Impact Assistance: Other 2.37

Although projects have been awarded, the county is still in the process of executing all subrecipient and beneficiary agreements. As of this report, no performance measures are required for the agreements that have been executed. Once all subrecipient and beneficiary agreements are executed that require mandatory programmatic and performance data, this information will be included in the project inventory section of this report.

For infrastructure projects that were awarded, the county has reviewed the Justice 40 Initiative Executive Order (EO) 14008 and Implementation Guidance (OMB M-21-28) for projects that could potentially meet the definitions of covered programs for disadvantaged communities. As of this report, the county has not identified any infrastructure projects that meet the criteria as outlined in the Executive Order. If the county is made aware of a project that meets EO 14008, the county will include the appropriate information in the project inventory section of this report.

Project Inventory

See Attachment A for the list of projects that have executed agreements and have incurred expenditures as of June 30, 2022.

Summary

Marion County's approach in allocating State and Local Fiscal Recovery Funds within the American Rescue Plan Act has been to use funds to support urgent COVID-19 response efforts to continue to decrease spread of the virus and bring the Pandemic under control, strengthen support for vital public services, support immediate economic stabilization for households and businesses, address systemic public health and economic challenges that have contributed to the inequal impact of the Pandemic, make generational improvements to city and county's infrastructure, all while making the greatest impact across the entire county and felt by as many county citizens as possible. The county's prioritization includes public and community input, collaboration with units of local government, and strategic overview and project selection by the Board of Commissioners. This report serves as the summary of the efforts taken by the County to help ensure a strong and equitable recovery for Marion County.
