

CLINIC-LEVEL PANDEMIC INFLUENZA PLANNING FORM

This form estimates the total number of people affiliated with your clinic who might need a vaccine. It should be completed after you have filled out the "Primary care clinic staff worksheet" and the "Patient priority groups and database parameters worksheet." If actual numbers of patients in each tier are not available through your administrative database, use the percentages provided* to form your estimates.

Clinic name: _____ Address: _____

City: _____ County: _____ State: _____ Zip Code: _____

Clinic pandemic influenza vaccine coordinator: _____

Telephone: _____ Fax: _____ E-mail: _____

Public health agency contact: _____

Telephone: _____ Fax: _____ E-mail: _____

Tier	Group description	Number
Tier 1A	Health care workers	
	Health care workers with direct patient contact and critical support staff	
	Total Tier 1A	
	<i>(Use the number from the last line on the "Primary care clinic staff worksheet.")</i>	
Tier 1B	Highest-risk patients	
	Patients 65 and older with at least one high-risk condition	
	Patients 6 months to 64 years with at least two high-risk conditions	
	Patients hospitalized in the past year due to pneumonia, influenza or another high-risk condition	
	Total Tier 1B	
<i>(For each subgroup, use the corresponding number from the "Number" column of the "Patient priority groups and database parameters worksheet." If specific numbers are not readily available, estimate Total Tier 1B by multiplying your clinic's total number of patients by 0.176.)</i>		
Tier 1C	Household contacts and pregnancy	
	Household contacts of children under 6 months	
	Household contacts of severely immunocompromised individuals	
	Pregnant women	
	Total Tier 1C	
<i>(For each subgroup, use the corresponding number from the "Number" column of the "Patient priority groups and database parameters worksheet." If specific numbers are not readily available, estimate Total Tier 1C by multiplying your clinic's total number of patients by 0.014.)</i>		
Tier 2A	Other high-risk groups	
	Patients 65 and older with no high-risk conditions	
	Patients 2 to 64 with one high-risk condition	
	Children 6 months to 23 months	
	Total Tier 2A	
<i>(For each subgroup, use the corresponding number from the "Number" column of the "Patient priority groups and database parameters worksheet." If specific numbers are not readily available, estimate Total Tier 2A by multiplying your clinic's total number of patients by 0.312.)</i>		
Tier 4	Healthy groups	
	Healthy persons ages 2 to 64 without any high-risk conditions	
	Total Tier 4	
<i>(If specific numbers are not readily available, estimate Total Tier 4 by multiplying your clinic's total number of patients by 0.499.)</i>		
Total clinic-affiliated individuals (sum of Tiers 1A, 1B, 1C, 2A and 4)		

* Percentages are based on 144,818 patients affiliated with the family practice clinics of the University of Wisconsin's Department of Family Medicine.
