

WELCOME HOME!

You may be new here, so here are some tips on how to be a good neighbor.

Grass clippings belong in the compost, not the ditch or drain. Improper disposal can spread weeds & impact fish or streams.

Leaves & litter cause flooding. Keep debris and leaves away from drains, especially during the rainy season. Utilize curbside compost & trash.

Dumping isn't just rude, it's illegal. Have tricky trash? Our website can help you find the proper place to dispose of it.

Pick up after your pet. This will protect our water & community from the spread of harmful bacteria.

Maintain your car to avoid oil spilling in the drain & reaching our streams.
