

**BEFORE THE BOARD OF COMMISSIONERS  
FOR MARION COUNTY, OREGON**

In the Matter of the Application of: ) Case No. CU24-006  
JOY BLACKMAN REVOCABLE TRUST ) **CONDITIONAL USE**

**ORDER NO. 24-116**

This matter comes before the Marion County Board of Commissioners ("Board") on the application of the Joy Blackman Revocable Living Trust for a Conditional Use to establish a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax lot 800).

The Marion County Hearings Officer held a duly noticed public hearing on this application on May 2, 2024, and issued a decision denying the proposal on July 30, 2024. The Hearings Officer's decision was appealed to the Board on August 14, 2024. The Board held a public hearing to consider the appeal, application, and findings on October 16, 2024. The Board closed the public hearing the same day and left the record open until October 30, 2024. A motion to approve the appeal was made during a Board session on November 6, 2024.

IT IS HEREBY ORDERED that the appeal is **APPROVED**, the Board overturns the Hearings Officer's decision on this matter, and adopts its own Findings of Fact which is attached as Exhibit A, subject to conditions attached as Exhibit B.

DATED this 11<sup>th</sup> day of December, 2024, at Salem, Oregon.

MARION COUNTY BOARD OF COMMISSIONERS

  
\_\_\_\_\_  
Chair  
  
\_\_\_\_\_  
Commissioner  
  
\_\_\_\_\_  
Commissioner

**JUDICIAL NOTICE**

Oregon Revised Statutes, Chapter 197.830, provides that land use decisions may be reviewed by the Land Use Board of Appeals by filing a notice of intent to appeal within 21 days from the date this Ordinance becomes final.

**Findings of Fact and Conclusions of Law**

The Board of Commissioners, after careful consideration of the testimony and evidence in the record, issues the following findings of fact:

1. No objections were raised to notice, jurisdiction, bias, *ex parte* contacts, conflict of interest, or to evidence or testimony by any party during the public hearing before the Board or otherwise during the appeal.
2. The subject property is designated Special Agriculture in the Marion County Comprehensive Plan and correspondingly zoned SA (Special Agriculture). The primary intent of both this designation and zone is to promote and protect commercial agricultural operations while also providing the opportunity for timber production and other uses that are compatible with agricultural activities.
3. The subject parcel consists of 5.97-acres of naturally forested hillside in the rural unincorporated area of south Salem. The forested area appears to consist of a mix of evergreen and deciduous trees. The slopes on this parcel are significant, and the geohazard overlay shows particularly steep slopes wrapping around the west, east, and south sides of the parcel. A south-pointing triangular section of the parcel based across the northern property line consists of relatively mild 2-point geohazard. The parcel is also within one of Marion County's SGO (Sensitive Ground Water) overlays indicating groundwater supply may be a concern now or in the future.

The access to the subject parcel is via an undeveloped easement that utilizes tax lots 2000, 2301, and 2300. Tax lot 2300 was partitioned twice, once in 2005 and again in 2008. Both new parcels had homes developed clustered together at the end of Little Haven Ln S. Tax lot 2000 was the subject of a measure 37/49 decision that has not been exercised, allowing that parcel to create two additional parcels and develop each with a dwelling.

4. The subject parcel was created in its current formation by partition in the fall of 1978 which legitimized the sale of this parcel and the description thereof which is included in the deed recorded in January 1978 on Reel 111 Page 1041 of the Marion County Book of Land Records and is therefore legal for land use purposes.

The Major Partition case (MJP78-078) divided a 10-acre parcel in the RA (Residential Agricultural) zone (a zone no longer existing in Marion County Code) into three parcels of approximately 2-acres, 2-acres, and 6-acres. At the time of the partition the land was jointly owned, and the partition was to accomplish division of this ownership. The subject parcel at this time was separated as described by the deed referenced above and came solely under the ownership of the Blackman family. The other two parcels created by this partition are accessed off Inland Dr S.

When Marion County adopted an updated Comprehensive Plan in 1982 the RA (Rural Agricultural) zone was removed, and the AR (Acreage Residential) zone was applied to these two smaller parcels. At this time the subject parcel in this case (CU24-006) was changed to SA (Special Agriculture).

5. Properties directly surrounding the subject parcel to the north, west, and south are zoned SA, and parcels to the east are zoned AR. The adjacent AR parcel tract extends to the City of Salem UGB which is a half-mile to the east. The UGB is also a half-mile north of the subject parcel. Some of the SA parcels around the subject parcel have woodlots and most of those are simultaneously in

use for rural residences. Many of the SA parcels around the subject parcel are solely in use for rural residences. A half-mile to the west is a large tract of AR zoned parcels that stretches to the Willamette River and western county line. Approximately one-half mile to the north of the subject parcel is the Illahe neighborhood within the City of Salem UGB. Between the subject parcel and Illahe are a couple SA zoned parcels under 10-acres with a couple acres each of personal orchards and/or fields for a few livestock animals. Half a mile to the south is another tract of AR zoned parcels that transitions into a few SA parcels in the same rural residential use off the same access road (Ballyntyne).

A quarter-mile west of the subject parcel is a 30-acre parcel with similar forest composition to the subject parcel. This 30-acre parcel had a wildlife habitat conservation plan approved in 2002 by AR02-055. The two parcels east of the habitat conservation area were both covered with timber forests up until 2016. Between 2016 and 2019 most of the trees (approx. 20 acres) were harvested on tax lot 100 which meets the subject parcel on its southwest corner. This area has been replanted but it is unclear from aerial photos if the replant was for Christmas tree or timber production. Between 2021 and 2023 about half of the trees (approximately 15-acres) were harvested on tax lot 1300, which is adjacent to the subject parcel on its southern property line. Based on aerial photos and the applicant statement, the clear-cut on tax lot 1300 has not been replanted. Due to the tree coverage and steep slopes on the subject parcel, the proposed homesite is screened and separated from these southern operations. North-adjacent to the subject parcel is a 10-acre stand of timber that may be harvested at a future date.

The most common agricultural use of the nearby SA parcels is production of Christmas trees. Just under a mile to the south of the subject parcel, on the other side of another tract of AR zoned parcels, is a nearly 200-acre parcel in use for grass seed or hay production. This is the closest parcel in commercial agriculture use. Farther to the south (2+ miles south of the subject parcel) are larger SA parcels in clear commercial agricultural use. The predominant land use around the subject parcel is for rural residences.

6. Marion County Soil Survey reports approximately 47.1% of the soils on the subject property as high value. The analysis lists a breakdown of the soils as follows:

<u>Soil Name</u> <u>Acres/Slopes</u>	<u>Soil Type</u>	<u>Soil Class</u>	<u>High Value</u>	<u>Soil Percent</u>
Nekia silty clay loam 2.8 acres, 2-7% slopes	NeB	3	Yes	47.0%
Nekia silty clay loam 2.3 acres, 20%-30% slopes	NeE	4	No	38.6%
Nekia silty clay loam 0.9 acres, 30-50% slopes	NeF	6	No	14.3%

7. The applicant proposes to establish a non-farm dwelling on the property.
8. The Marion County Planning Division requested comments on the Application from various governmental agencies.

Marion County Public Works Land Development and Engineering Permits (LDEP) commented:  
ENGINEERING REQUIREMENTS

A. At the time of application for building permits an Access Permit will be required for obtaining access at the private access easement Little Haven Lane connection to public road Viewcrest Road.

B. The subject property will be assessed Transportation & Parks System Development Charges (SDCs) upon application for building permits.

C. Utility work in the public right-of-way requires separate PW Engineering permits.

ENGINEERING ADVISORY

D. The applicant should coordinate with the local Fire Department to confirm any Emergency Vehicle Access requirements given the fact that Little Haven Lane is quite narrow.

Marion County Building Inspection commented:

“No Building Inspection concerns. Permits are required to be obtained prior to development and/or utilities installation on private property. Depending on site conditions and proposed home location, a geotechnical assessment of soils and slopes for adequate support of the home may be required during plan review.”

Marion County Septic Division commented:

“A septic site evaluation is required to establish a viable initial and repair area. A site evaluation may be applied for at the Marion County Public Works campus building 1.”

City of Salem Fire Department commented:

“Items including fire department access and water supply will be required per the Oregon Fire Code at the time of development.”

All other contacted agencies either failed to comment or stated no comment or no objection to the proposal.

9. Under MCC 17.119.020, a conditional use application may only be filed by certain people, including the owner of the property subject to the application. A deed recorded in the county records at Reel 1706, Page 497 shows the Joy M. Blackman Revocable Living Trust owns the subject property. The application was filed by appropriate persons. MCC 17.119.020 is satisfied.
10. Under MCC 17.119.025, a conditional use application shall include signatures of certain people, including all owners of the subject property. Joy Blackman, Trustee of the Joy M. Blackman Revocable Living Trust owns the subject property and signed the application. MCC 17.119.025 is satisfied.
11. MCC 17.137.050 provides for Conditional Uses in a Special Agriculture Zone. MCC 17.137.050(A) includes a single-family dwelling or mobile home not in conjunction with farm uses, subject to the criteria and standards in MCC 17.137.060(B), 17.137.070, and MCC 17.137.100. Applicant’s application is for a single-family, nonfarm dwelling on the subject property.
12. MCC Chapter 17.110 is the Marion County Rural Zoning Code. Its purpose is to provide and coordinate regulations governing the development and use of lands in the portions of Marion County outside acknowledged urban growth boundaries that implement and confirm to the County Comprehensive Plan. Its purpose is also to promote and protect the public health, safety and general welfare. MCC 17.110.003(A)(B).
13. MCC 17.110.800 *Dwellings and all other buildings to be accessible to public street* provides:

*Every dwelling shall be situated on a lot having direct access by abutting upon a public street or a pre-existing private driveway of a width not less than 20 feet. A private drive shall not serve*

*more than four dwelling units unless the parcels, on which those units are proposed to be placed were established with the approval of Marion County in accordance with State law and Marion County ordinance prior to May 1, 1977, or were approved under ORS Chapter 17.121 MCC Planned Development.*

MCC 17.110.800 places a limit on the number of dwellings accessed off a private easement. Marion County has long interpreted MCC 17.110.800 to allow a property that has frontage on a public street not to be considered “served” by the private easement. Applicant and Marion County’s interpretation of the provision relies on the language “*having direct access by abutting upon a public street or a pre existing private driveway.*”

Marion County interprets the limit in MCC 17.110.800 to be four parcels with dwellings and without frontage on a public road. This interpretation allows for an objective determination by counting the parcels that would be landlocked without the easement they rely on. Parcels with dwellings that have frontage on a public street, even if they use the easement, are not counted towards the maximum of four parcels with dwellings. Development of additional dwellings beyond that limit requires an approved variance to MCC 17.110.800 that meets the criteria in MCC 17.120.020.

Little Haven Lane S currently serves four parcels with homes, but one (tax lot 2000) also has frontage on Viewcrest Rd S. Therefore, one additional dwelling without frontage on Viewcrest Rd S could be approved on Little Haven Ln S without requiring a variance to MCC 17.110.800. Marion County determined that three dwellings without frontage utilize the easement, and the dwelling in the present application would be the fourth. Staff provided testimony that the interpretation of MCC 17.110.800 has been consistently applied to previous decisions. Staff correctly found all criteria in MCC 17.137 required for a conditional use non-farm dwelling were met for the subject parcel.

Appellants of the staff decision argue that the only “direct access” for the homes on Little Haven Lane S (Tax Lots 2000, 2300, 2301, and 2302) is through Little Haven Lane. Appellants argue that the express language of MCC 17.110.800 prohibits a private drive from serving more than four homes. Marion County expressly rejects this interpretation.

The Marion County hearings officer incorrectly interpreted MCC 17.110.800 to require that dwellings must be situated on a lot having direct access to the abutting public street that actually permits access or a pre-existing private driveway. Based on this determination, the Hearings officer denied the application on the grounds that it requires an approved variance to MCC 17.110.800. The hearings officer found that the criteria specific to the conditional use non-farm dwelling in MCC 17.137 were met.

The Marion County Board of Commissioners overturns the Hearing Officer’s determination regarding MCC 17.110.800 and affirms Marion County’s long-time interpretation that a dwelling is considered to have direct access to a public street when its parcel abuts the public street.

Marion County interprets MCC 17.110.800 consistent with its plain reading and long-time interpretation. However, even if the interpretation advanced by the hearings officer was plausible, that would only mean that the county code contains conflicting provisions capable of multiple plausible interpretations. If that were the case, as an alternative basis of approval, Marion County exercises its discretion under *Siporen v Medford* to consider and choose among multiple plausible interpretations of its own county code to reach the same result as what Marion County understands the plain language to require.

The Marion County Board of Commissioners also considered whether the application could be approved under the ordinance based on parcels existing prior to May 1, 1977. Because the Board approved the application based on direct access, it is unnecessary to resolve this question. The Board does not make a determination related to whether parcels existed prior to May 1, 1977.

14. MCC 17.137.010 provides the SA purpose statement:

*The SA (special agriculture) zone is applied in areas characterized by small farm operations or areas with a mixture of good and poor farm soils where the existing land use pattern is a mixture of large and small farm units and some acreage homesites. The farm operations range widely in size and include grazing of livestock, orchards, grains and grasses, Christmas trees and specialty crops. The range in size of management units present no significant conflicts and allow optimum resource production from areas with variable terrain and soils. It is not deemed practical or necessary to the continuation of the commercial agricultural enterprise that contiguous ownerships be consolidated into large parcels suitable for large scale management. Subdivision and planned developments, however, are not consistent with the purpose of this zone and are prohibited.*

*This zone allows the flexibility in management needed to obtain maximum resource production from these lands. It emphasizes farm use but forest use is allowed and protected from conflicts. The SA zone is intended to be applied in areas designated special agriculture in the Marion County Comprehensive Plan.*

*The SA zone retains Class I through IV soils in commercial farm units comparable to those in the vicinity or in small scale or specialty commercial farms where the land is especially suited for such farming. The SA zone is intended to be a farm zone consistent with ORS 215.283.*

15. The following code, 17.137.060(A), applies to all conditional uses in the SA zone:

*1. The use will not force a significant change in, or significantly increase the cost of, accepted farm or forest practices on surrounding lands devoted to farm or forest use. Land devoted to farm or forest use does not include farm or forest use on lots or parcels upon which a non-farm or non-forest dwelling has been approved and established, in exception areas approved under ORS 197.732, or in an acknowledged urban growth boundary.*

The access to, and location of, the proposed dwelling will cluster it with adjacent rural residential uses. The 130-foot setback from the northern property line will create a buffer between the proposed dwelling and the stand of timber to the north. The access to the subject parcel is achieved through an existing, although undeveloped, easement extending Little Haven Ln S across AR zoned parcels with dwellings. There are no adjacent agricultural uses that could be disturbed by the proposed placement of a non-farm dwelling.

A farm/forest declaratory statement will be a condition of approval to ensure the property owner, and future owners, of the subject parcel are aware that the priority of the SA zone is agricultural and/or timber uses, and that owners and inhabitants of the proposed non-farm dwelling shall not infringe, inhibit, or complain about the effects of these uses on the subject dwelling.

Most of the lands surrounding the subject property are not devoted to farm or forest use. With respect to the parcels to the south and southwest that by be considered to be devoted to some type of resource use, the topography of the area is such that it is unlikely that there is any accepted

farm or forest practices that would occur adjacent to the subject property. One additional dwelling in the area would not have a significant effect that any of the other residences may have had on the farming and forest uses in the area.

The use of the subject parcel for siting a non-farm dwelling using the existing easement to access the proposed building area with the modified setbacks of 130-feet to the north and 100-feet to the east, west, and south, will not cause change in, or significantly increase the cost of, farm or forest uses on surrounding parcels in the area. The criterion is met.

*2. Adequate fire protection and other rural services are, or will be, available when the use is established.*

Applicant states that the subject parcel is within the Salem Suburban Fire District and the Marion County Sheriff's Department. Salem Fire Department commented that fire department access and water supply will be required prior to development. The subject property is served by the Salem Suburban Fire District. Based on the evidence in the record Applicant has demonstrated that fire protection access is feasible. All fire protection services may be attained for the proposed dwelling to be established.

Applicant states that the subject parcel will have a well, septic, and electrical service on the subject property. Electrical service, provided by PGE, is available on Little Haven Ln S and could be extended via the undeveloped easement that travels over parcels 083W07A002000, 083W07A002301, and 083W07A002300 to the subject parcel. Permits for a well will need to be filed for with the Oregon Water Resources Department. Permits related to a septic system will need to be filed with Marion County Septic Division. All required rural services may be attained for the proposed dwelling to be established. The criterion is met.

*3. The use will not have a significant adverse impact on watersheds, groundwater, fish and wildlife habitat, soil and slope stability, air and water quality.*

The Application is for placement of a non-farm dwelling. The Applicant states that most of the parcel will be left wooded because harvesting the timber on this property is cost-prohibitive due to the slopes present. Development of access, and fuel breaks will require some timber be harvested. Due to those geohazards on this property, the site of the proposed dwelling is limited to an area in the middle northern section of the property. Staff has stated that siting the proposed dwelling on this area of the property is not expected to have any deleterious effect on the soils or slope stability.

The subject parcel is not within the Big Game Overlay. This property is within the Sensitive Groundwater Overlay and a Declaratory Statement acknowledging this will be a condition of approval. The criterion may be met with respect to the proposed dwelling site itself. However, the inquiry must also address the fact that the use requires a significant extension to the access road easement. The extension will require significant land clearing and slope regrading through a significant landslide area as shown in the Marion County geohazard overlay.

Marion County Building Inspection commented that depending upon site conditions, a geotechnical assessment of soils and slopes for adequate support of the home may be required during plan review. This would include access to the home. Tree removal and site grading within the steep slope area will require a Geological Hazard Overlay Permit. Concerns regarding potential slope stability issues can be addressed through the permit process. This criterion is met.

*4. Any noise associated with the use will not have a significant adverse impact on nearby land uses.*

Any noise associated with the proposed development, post-construction, will be the normal noise of a dwelling in residential use. Based on the proposed site, the nearest dwellings will be over 500 feet away and shielded by trees. Any noise created by this dwelling will not have an adverse impact on the nearby land uses. The criterion is met.

*5. The use will not have a significant adverse impact on potential water impoundments identified in the Comprehensive Plan, and not create significant conflicts with operations included in the Comprehensive Plan inventory of significant mineral and aggregate sites.*

There are no water impoundments on or near the subject property, nor are there any aggregate sites in the surrounding area. The criterion does not apply.

16. Non-farm dwellings are subject to MCC Section 17.137.050(A). One of the requirements is that the proposed dwelling meet the provisions listed in 17.137.060(B), which reads as follows:

*B. Non-Farm Dwellings. The following additional criteria apply to non-farm dwelling requests:*

*1. The dwelling will be sited on a lot or parcel that is predominantly composed of Class IV through Class VIII soils that would not, when irrigated, be classified as prime, unique, Class I or Class II soils. Soils classifications shall be those of the Soil Conservation Service in its most recent publication, unless evidence is submitted as required in MCC 17.136.130.*

Marion County Soils Analysis, based on NRCS (Natural Resources Conservation Service) soil data, reports that the subject parcel is composed of 52.9% non-high value soils consisting of respectively 38.6% NeE (Nekia silty clay loam with 20%-30% slopes) which is a Class IV soil and 14.3% NeF (Nekia silty clay loam with 30%-50% slopes) which is a Class VI soil. Nekia silty clay loam classifications with slopes above 20% are not listed on the NRCS table of high value soils when irrigated in Marion County. The criterion is met.

*2. The dwelling will be sited on a lot or parcel that does not currently contain a dwelling and was created before January 1, 1993. The boundary of the lot or parcel cannot be changed after November 4, 1993, in any way that enables the lot or parcel to meet the criteria for non-farm dwelling.*

The parcel was created by partition (MJP78-078) in 1978 to legitimize the description of the property as conveyed in a deed recorded earlier the same year on Reel 111 Page 1041 of the Marion County Book of Land Records and has existed in this configuration ever since then. The property does not contain a dwelling. The criterion is met.

*3. The dwelling will not materially alter the stability of the overall land use pattern of the area. In making this determination the cumulative impact of possible new non-farm dwellings on other lots or parcels in the area similarly situated shall be considered. To address this standard, the following information shall be provided:*

*(a) Identify a study area for the cumulative impact analysis. The study area shall include at least 2,000 acres or a smaller area not less than 1,000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other, adjacent agricultural areas. Findings shall describe the study area, its boundaries, the location of the subject parcel within this area, why the*

*selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or non-resource uses shall not be included in the study area;*

The applicant provided a study area encompassing 2,000-acres of surrounding land. This study area included only properties zoned for Farm Use. Lands zoned for rural residential or other non-resource uses were excluded. Information supplied by the applicant, and verified by planning staff, indicates that there is no non-resource zoned land applied to the study area and that the Applicant's report meets the required area for resource zone analysis.

The applicant has indicated this study area is representative of the land use pattern surrounding the subject parcel. Uses within the study area include rural residences, timber lots, natural woods, Christmas tree lots, and fields of row crops. The Board finds that the area presented by the applicant is a fair representation of the surrounding area and is sufficient to arrive at a sampling of the land use pattern.

*(b) Identify within the study area the broad types of farm uses (irrigated or non-irrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm dwellings that could be approved under MCC 17.136.050(A), including identification of predominant soil classifications and parcels created prior to January 1, 1993. The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible non-farm dwellings under this provision;*

The subject parcel is within an area near the edge of the City of Salem UGB, an area which contains several large tracts of Acreage Residential zoned parcels. As a result, the 2,000-acre study area creates a meandering shape that wraps around these tracts and extends around and above peninsulas of residential-neighborhoods. The largest contiguous space of the study area exists in the southern half.

The Applicant noted that due to the steep slopes and low value soil, most of the parcels included in the 2,000-acre study area have woodlots and are not in agricultural use. Based on Marion County aerial photographs of the region, very few of the woodlots appear to be intentionally planted stands of timber. One of the stands is directly north adjacent to the subject parcel. South adjacent is a clearcut that occurred between 2021 and 2023. Southwest adjacent of the subject parcel was a clear cut from between 2016-2019 that has been replanted. It is unclear from aerial photographs if this parcel has been replanted with timber or with Christmas trees. Roughly half of the wooded areas within the study area are covered with deciduous trees and irregularly growing evergreen trees. These naturally wooded areas are not considered to be in timber use. The largest stands of timber range from 10-15 acres and are on properties that contain dwellings.

The most common agricultural use in the study area appears to be for the purpose of harvesting Christmas trees. The largest Christmas tree operation in the area is only partially within the study area. The entire operation consists of approximately 60-acres of Christmas trees planted across 3-parcels which total over 200-acres. This operation is on the southernmost edge of this 2000-acre study, and less than half of the total operation is within the study area.

The largest single parcel in agricultural use is also on the southernmost edge of the 2000-acre study. This parcel is almost 200-acres and has 127-acres devoted to grass seed or hay production, and 20-acres devoted to Christmas trees. It is worth noting that a few acres of the Christmas tree

lot falls outside of the study area. The other two large parcels in agricultural use are both on the northernmost edge of the 2000-acre study area. These parcels are contiguous and along the Willamette River north of Illahe. One is 97-acres, and the other is 182-acres, both appear in use for row crops. The northernmost parts of the 182-acre parcel falls outside of the study area.

A total of 137 parcels were included in the study area. Of these included parcels, 124 are zoned SA and 13 are zoned EFU. Only five parcels in the study area are larger than the minimum 80-acres for SA and EFU zoned parcels. 60% of the parcels are under 10-acres in size.

Of the parcels included in the study area, 92 have at least one dwelling and there are a total of 101 dwellings on these 92 parcels. 84 of those parcels had a dwelling prior to 1993. A total of 8 parcels have been developed with homesites in the last 30 years. Since 1993, four non-farm dwellings have been approved within the study area. Three of these were approved in the 90s, and the fourth in 2004. Also, since 1993, three lot of record dwellings were approved, and three replacement dwellings were approved. While not permanent, four hardship dwellings have been approved in the study area since 1993.

Seven parcels within the study area that have neither a dwelling nor predominantly high value soils. These parcels would therefore potentially be able to qualify for additional non-farm dwellings. However, five of these parcels were involved in Measure 37/49 claims. As a result, these parcels would develop single family dwellings as a result of their Measure 49 decisions, and not through application for non-farm dwellings. A total of seven dwellings may result from these Measure 49 orders. The remaining two parcels that could potentially qualify for non-farm dwellings are both of relatively large sizes and in timber use.

The Applicant contends that the most common use of parcels within the study area is for rural residential purposes, and that allowing development of a single-family dwelling on the subject parcel would not destabilize the less common farm and timber uses in the area. The commercial agricultural uses within the study area are restricted to the northern and southern most parcels, all three of these operations are 0.7-0.9 miles from the subject parcel on the other side of rural residential clusters. The proposed dwelling would be consistent with the development pattern that has occurred on the SA and EFU parcels surrounding the subject parcel.

*(c) Determine whether approval of the proposed non-farm dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase, or lease farmland, or acquire waste rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.*

Approval of this application would bring the total number of post-1993 non-farm dwellings within the study area to five. The subject parcel is 5.97-acres and would fit within the current land use pattern of small acreage homesites scattered through the area. The subject parcel has never had a dwelling not been involved in agricultural use.

If the other two parcels that could potentially develop non-farm dwelling were able to do so, they would not be able to materially alter the land-use pattern in the area. The dominant land-use pattern in this area is for rural residential use and has been for more than 30 years.

The proposed dwelling would be built within an existing cluster of residences, accessed on private lane that serves adjacent AR zoned parcels. The proposed dwelling site would be shielded by trees and topography from adjacent SA zoned parcels. These adjacent parcels while involved in timber use, do not appear to be involved in agricultural uses. The access and isolation of the proposed dwelling shield it from the scattered agricultural use of Christmas tree production in the area. The parcels in the study area involved in row crop production are all on the other side of residential neighborhoods from the subject parcel, so it is unreasonable to say that the proposed dwelling will have any effect on those farming operations. The proposed dwelling will not make it more difficult for the few existing farming activities to continue and would not materially alter the land use stability of the area. The criterion of MCC 17.137.060(B)(3) are met.

17. In addition, non-farm dwellings shall be subject to the following code as provided for in 17.137.070, Non-farm dwelling requirements:

*(A) Special Setbacks.*

*1. Dwellings. A special dwelling setback of 200 feet from any abutting parcel in farm use or timber production is required.*

*2. Accessory Buildings. A special setback of 100 feet is required for buildings accessory to a dwelling from any abutting parcel in farm use or timber production.*

*3. Adjustments. The special setbacks in subsections (A)(1) and (2) of this section may be reduced if it is determined, concurrently with any land use application or as provided in Chapter 17.116 MCC, that a lesser setback will meet the following review criteria for alternative sites:*

*a. The site will have the least impact on nearby or adjoining forest or agricultural lands.*

*b. The site ensures that adverse impacts on forest operations and accepted farming practices on the tract will be minimized.*

*c. The amount of agricultural and forestlands used to site access roads, service corridors, the dwelling and structures is minimized.*

*d. The risks associated with wildfire are minimized.*

Applicant proposes reducing the setbacks from 200-feet to 100-feet considering the dimensions of the property (an imperfect square of approximately 500 by 500-feet) and the significant slopes which create geohazard areas across much of the eastern, western, and southern sides of the parcel. The most reasonable buildable area is the middle of the northernmost third of the parcel. This area is closest to where the easement enters the property and is the flattest area, though still within the geohazard 2-point overlay. This site would put the proposed dwelling potentially 100-feet from the timber lot directly north-adjacent to the subject property. The applicant would have to sign a farm/forest declaratory statement as a condition of approval, in which they would recognize these timber uses are a priority above a non-farm dwelling in this zone and shall not be interfered with or complained about.

The proposed location would allow for the existing easement to be used, which would travel over AR zoned land that is not being used for agricultural or timber purposes. The subject parcel is served by the Salem Suburban Fire District and will comply with all relevant fire district code imposed by the SSFD.

It is generally considered prudent to have 2-acres to be able to site a dwelling, septic tank and drainfield, replacement drainfield area, and a well. If the 200-foot setbacks were imposed, the practical buildable area would be roughly a quarter of an acre. The buildable area increases to almost 1-acre with the proposed 100-foot setbacks. The prohibitive geohazard slopes present on

the eastern, western, and southern portions of this property make the northern setback the primary variable in potentially developable space on this parcel.

The northern parcel has a 10-acre stand of timber directly adjacent to the subject parcel. Depending on how the Applicant would implement the fuel breaks imposed by 17.137.070(B), the effective setback from the northern parcel will end up being at least 130-feet. The primary safety zone is 30 feet around all structures, with some slope related extensions that may affect this property depending on the siting of the proposed dwelling. The secondary fuel break area is 100-feet around the primary safety zone. The secondary fuel break area requires pruned and spaced vegetation so that fire would not spread between the crowns of trees, or between trees via vegetation between them.

To reduce the setback on the northern parcel below 130ft would conflict with the criteria of 17.137.070(A)(3)(d) and 17.137.070(B)(3) due to the requirements to meet the primary and secondary fuel break areas.

A reduced special setback of 130-feet from the northern property line, and 100-feet from the western and southern property lines for the proposed dwelling and any future accessory structures would maintain the intent of the Special Setback Code and meet the criteria in subsection (A)(3)(a-d). The special setbacks do not apply to the eastern property line adjacent to parcels in the AR zone. These criteria are met.

*4. The special setback in subsection (A)(1) of this section shall not be applied in a manner that prohibits dwellings approved pursuant to ORS 195.300 through 195.336 nor should the special setback in subsection (A)(1) of this section prohibit a claimant's application for homesites under ORS 195.300 through 195.336.*

The proposed dwelling is not subject to/a part of a Measure 37 or 49 claim. The criterion does not apply.

*(B) Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to provide continuing fire hazard management in accordance with Chapter 3 of "Fire Safety Consideration for Development in Forested Area," 1978, and any revisions thereto.*

The updated version of the standards within the document above is referenced in the EFU-equivalent of this section of code: 17.136.070 (B). "Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200-feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry."

The property north of the subject parcel has approximately 10-acres devoted to timber production directly adjacent to the subject parcel. The primary and secondary fuel-free break areas shall be conditions of approval. The criterion is met.

*(C) Prior to issuance of any residential building permit for an approved non-farm dwelling under MCC 17.136.050(A), evidence shall be provided that the county assessor has disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.113 or 308A.724 or*

321.359(1)(b), 321.842(1)(A) and 321.716. A parcel that has been disqualified under this section shall not requalify for special assessment unless, when combined with another contiguous parcel, it constitutes a qualifying parcel.

The criterion can be met with a condition of approval: the applicant shall submit evidence to Marion County Planning that the property has been disqualified from farm/forest deferral by the Marion County Tax Assessor's Office prior to receiving approval of a building permit. The criterion is met.

18. Non-farm dwellings must also meet the standards in MCC 17.137.100, which are listed below

*(A) Maximum Height.*

1. *Dwellings: 35 feet.*

2. *Farm-related structures on farm parcels: none.*

3. *Nonresidential and non-farm structures: 35 feet unless they are in conjunction with conditional uses allowed in MCC 17.137.050, and a greater height is requested and approved as part of the conditional use permit.*

Compliance with this shall be verified at the time of building permits. The criteria can be met.

*(B) Minimum Setbacks. Except as required in MCC 17.137.070(A), the following setback requirements shall be implemented for all new structures other than farm-exempt buildings, signs and fences:*

1. *Rear Yard. A minimum of 20 feet.*

2. *Side Yard. A minimum of 20 feet, except for lots or parcels of one-half acre or smaller created prior to January 1, 1994, in which case the side yard setback shall be five feet.*

3. *Front Yard. A minimum of 20 feet. When by ordinance a greater setback or a front yard of greater depth is required than specified in this section, then such greater setback line or front yard depth shall apply (See Chapter 17.112 MCC).*

The dwelling and any future accessory structures shall be subject to MCC 17.137.070(A), as adjusted in the conditions of approval. Therefore, these criteria do not apply.

*(C) Declaratory Statement. For all dwellings, and other uses deemed appropriate, the property owner shall be required to sign and allow the entering of the following declaratory statement into the chain of title of the lot(s) or parcel(s):*

*"The property herein described is situated in or near a farm or forest zone or area in Marion County, Oregon, where the intent is to encourage, and minimize conflicts with, farm and forest use. Specifically, residents, property owners and visitors may be subjected to common, customary and accepted farm or forest management practices conducted in accordance with federal and state laws that ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantors, including their heirs, assigns and lessees do hereby accept the potential impacts from farm and forest practices as normal and necessary and part of the risk of establishing a dwelling, structure or use in this area, and acknowledge the need to avoid activities that conflict with nearby farm and forest uses and practices, grantors will not pursue a claim for relief or course of action alleging injury from farming or forest practice for which no action is allowed under ORS 30.936 or 30.937."*

A declaratory statement could be made as a condition of approval. The criteria could be met.

**Conditions of Approval**

It is hereby found that the Applicant has met its burden of proving the applicable standards and criteria for approval of a conditional use application to place a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax Lot 800). Therefore, the Conditional Use application is APPROVED with the following conditions:

1. The applicant shall obtain approval for all permits, including subsurface sewage, as required by the Marion County Building Inspection Division.
2. The proposed dwelling and any future accessory structures shall maintain a 130-foot minimum setback from the northern property line and a 100-foot minimum setback from the western and southern property lines.
3. Prior to obtaining building permits, the applicant must provide evidence to the Planning Director that the county Assessor's Office has permanently disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.113 or ORS 308A.724 or ORS 321.359(1)(b), ORS 321.842(1)(A) and 321.716.
4. Prior to issuance of a building permit for the new dwelling, the applicants shall sign and submit a Farm/Forest & SGO & Geohazard Declaratory Statement to the Planning Division. This Statement shall be recorded by the applicant with the Marion County Clerk after it has been reviewed and signed by the Planning Director.
5. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry.
6. The dwelling shall be addressed 3308 Little Haven Ln S, effective when building permits are applied for. This address is subject to change if the driveway location changes.

MARION COUNTY BOARD OF COMMISSIONERS

Board Session Agenda Review Form

Meeting date: November 6, 2024

Department: Public Works

Title: Deliberation on appeal of Hearings Officer's decision on Conditional Use Case 24-006/Joy Blackman Revocable Trust

Management Update/Work Session Date: N/A Audio/Visual aids [ ]

Time Required: 15 min Contact: John Speckman Phone: 503-566-4173

Requested Action: To approve or deny Conditional Use Case 24-006/Joy Blackman Revocable Trust. Options for consideration: 1. Approve the application based on evidence that the parcel was created prior to 1977. 2. Approve the application based on interpretation of MCC 17.110.800 that this property is the fourth property using the easement. 3. Deny the appeal and uphold the hearing officer's decision denying. 4. Remand the request to the hearings officer for further consideration.

Issue, Description & Background: The Joy Blackman Revocable Trust applied for a conditional use permit to establish a non-farm dwelling on a 5.97-acre parcel in a Special Agriculture zone located in the 3300 block of Little Haven Lane S, Salem. The Marion County Hearings Officer held a duly noticed public hearing on this application on May 2, 2024, and issued a decision denying the application on July 30, 2024, based on the determination that a variance would be required to MCC 17.110.800 to allow more than four dwellings to be accessed by off the private road, Little Haven Lane. The appellants disagree with the Hearings Officer's application of MCC 17.110.800 and request the board make a interpretation of the code. A duly notice public hearing with the board was held on October 16, 2024, and the record was left open until November 6, 2024.

Financial Impacts: None

Impacts to Department & External Agencies: None

List of attachments: Table of options, Appeal, Planning Director's Decision, Hearing Officer's Decision

Marion County Board of County Commissioners  
555 Court St. NE  
Salem, Oregon 97301

**RE: Conditional Use Case No 24-006 – Appeal of Order  
File Number: 23-064**

Dear Commissioners:

This office has been working with the property owners on their application to develop a single homesite on property that the family has owned for 50 years. The property owners have been working with the County's Planning Department over the last year to obtain the necessary approvals to implement their plan and have attempted to engage with their neighbors during this time to address any questions or concerns that individuals might have about the proposal. After an appeal by some of the neighbors of the Planning Department's initial approval of the application, the County's Hearings Officer found that the proposal met all of the criteria for a conditional use to establish a non-farm dwelling on their property with the exception of a generally applicable development criteria that limits the number of dwellings that can utilize a private drive. The applicant and property owners respectfully request that the Board of County Commissioners accept its appeal to review and reconsider the interpretation of MCC 17.110.800 by the Hearings Officer. We thank you in advance for your time and thoughtful consideration of this request, which would allow the property owners to develop their property consistent with all other requirements of County Code.

The property owner is appealing the decision in this case for the limited purpose of reviewing the Hearings Officer's interpretation of MCC 17.110.800. Besides this single criterion, the property owners agree fully with the remainder of the County Hearings Officer's decision. A separate letter has been provided to you from the property owners, a copy of which enclosed with this letter, that details some of the relevant background and history related to the family's ownership of the property. The property owners understand and respect that generally applicable zoning controls are fundamental regulations that are intended to minimize potential conflicts

between uses and users. For the reasons that follow, the property owners respectfully request that the Board of Commissioners accept their appeal and reconsider the Hearings Officer's interpretation of the County's Zoning Code for the following reasons:

- The Hearings Officer's decision in this case reverses the County Planning Department's established interpretation of MCC 17.110.800 (see pg. 4 and 8 of the decision). The applicant and the County's Planning Staff could find no prior appeals interpreting this particular code provision and could find no other materials indicating that the Planning Staff's interpretation has given rise to similar issues elsewhere in the County. The Hearings Officer's interpretation represents a departure from an interpretation that had been applied previously without incident. The Board has the opportunity to restore the status quo in this case.
- The facts of this case appear somewhat unique, limiting the impact of any decision the Board makes to a very specific group of properties across the County. Furthermore, the resulting difference between the two interpretations at issue here is not substantial – it is the difference in the number of residences (presumably one or two additional) that are allowed to utilize an access.
- The Board's decision in this case would not expand or limit any private easement or access rights. Property owners would still be required to own underlying easement rights in order to utilize a private driveway access. The Planning Department's interpretation in this case simply allows property owners to better utilize those existing property rights and to more fully realize their property's potential.
- The single issue on review involves the interpretation of the County's zoning code. The legislature recognizes that local governments are in the best position to interpret their own code provisions. State law therefore requires that any interpretation made by a local government's governing body be affirmed under the highly deferential standard of review set forth in ORS 197.829(1) and as articulated by the Oregon Supreme Court in *Siporen v. City of Medford*, 349 Or 247, 243 P3d 776 (2010). Put another way, so long as the Board's interpretation of its own plan or code is plausible, that interpretation must be affirmed even if other competing plausible interpretations may exist.
- The more deferential standard of review does not extend to decisions made by a hearings officer. This Board is in a unique and important position to express County policy through an interpretation of the County's zoning code.

The Board has the ability in this case to reinstate the County Planning Department's approach and to interpret the driveway criteria in a manner that allows the property owners to utilize their existing easement to access a dwelling that otherwise meets all of the County's applicable criteria for a non-farm dwelling on their property. The decision in this case thoroughly establishes that the most common use of land in the area is for rural residential purposes and the property owners are simply hoping to use their land in the same manner as their neighbors. As noted in the letter from

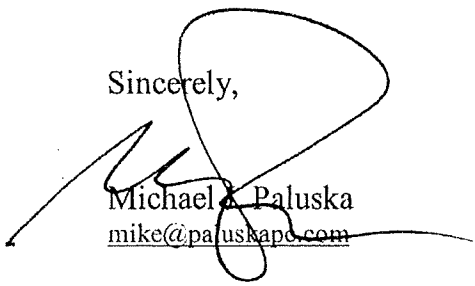

the property owners, as well as in the decision, the easement serving this property has been in place for many years and predates the ownership of most, if not all of the neighbors that currently live in the area. The topography of this area is challenging, and this easement was established long ago, as it is the most practical way to access this particular parcel of land. All other potential access points are prohibitively steep and cannot feasibly serve a residence or provide emergency access.

The property owners in this case want to continue to be good neighbors and to work to implement solutions to improve this access for the neighbors on Little Haven Lane today, and into the future. The property owners are aware that Measure 37/49 development rights exist on nearby property and that additional dwellings could potentially be developed at any time. The property owners do not oppose plans to implement those development rights and would welcome the opportunity to work with the neighboring landowner to ensure access rights are sufficient to support any planned development. In fact, the property owners in this case have offered to sign a nonremonstrance agreement or similar commitment not to oppose development these additional single-family dwellings.

The property owners have attempted at every step to approach this the right way. The application was filed back in February and they have patiently waited for this process to play out, providing an extension of time to review the decision, even as the building season passes by. As noted above, this is an issue that is squarely within the authority of the Board to decide. For all of the reasons previously identified, the property owners respectfully request that the Board of Commissioners accept its appeal to review and reconsider the interpretation of MCC 17.110.800 rendered by the Hearings Officer and to adopt an interpretation of the County's Zoning Code that reinstates the prior interpretation as applied by the Planning Department.

Sincerely,

Michael Paluska

Enclosure(s) 1 – letter from property owners

cc: Client by email only

John Speckman, Marion County Planning Department by email only

In 1974, Jim and Joy Blackman first purchased land on Inland Drive, quickly falling in love with the serene beauty of the area. Jim was offered the chance to acquire additional land on the Viewcrest Hill, but, regrettably, he did not seize the opportunity at that time. However, with his family's future in mind, he did purchase 5.97 acres on Viewcrest Hill for his son, Steve, to build a home on for his future family. At the time, the area was largely undeveloped—there were no neighboring houses—and Jim took special care to ensure that there would be proper access to this property by working with Marion County to establish a full access easement.

Over the years, Jim and Joy made their mark on Inland Drive. They eventually sold their first house but remained deeply rooted in the community by building a new home right next door in 1987. Although Jim passed away in 2007, Joy has remained in that home, surrounded by various family members who have lived with her over the years, ensuring she has never had to live alone.

In 2021, a significant milestone was reached when Joy's daughter, Sherry Blackman, and her grandson, Jason Unruh, were able to purchase back Jim and Joy's original house. The entire family was thrilled to have this piece of their history return to them.

For decades, the Viewcrest Hill land has been more than just a piece of property; it has been the cornerstone of the Blackman family's legacy, which now extends to 32 members. The land purchased off Little Haven has remained in the family for all these years, with taxes faithfully paid, not as a mere investment, but with the clear intention of building a home—a place where future generations could create memories, just as the family has done for so long.

Given this deep, generational connection to the land, it is profoundly disheartening to now face barriers to using the property as it was always intended. Being denied access for residential use feels not just like a denial of rights, but a denial of the dreams and heritage that have been cherished by the Blackman family for nearly half a century.

BEFORE THE MARION COUNTY HEARINGS OFFICER

In the Matter of the Application of: ) Case No. CU 24-006  
JOY BLACKMAN REVOCABLE TRUST ) **CONDITIONAL USE**

**I. Nature of the Application**

This matter is before the Marion County Hearings Officer on the Application of the Joy Blackman Revocable Living Trust for a Conditional Use to establish a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax lot 800).

**II. Relevant Criteria**

Standards and criteria relevant to this Application are found in the Marion County Code, Title 17, especially Marion County Code: Chapter 17.137 Special Agriculture Zone.

**III. Public Hearing**

A public hearing was held on this matter on May 2, 2024. The Planning Division file was made part of the record. The following persons appeared and provided testimony at the hearing:

- |     |                     |                                 |
|-----|---------------------|---------------------------------|
| 1.  | John Speckman       | Marion County Planning Division |
| 2.  | Mike Paluska        | Attorney for Applicant          |
| 3.  | Carrie Richter      | Attorney for Appellant          |
| 4.  | Mary Judith Upright | Appellant                       |
| 5.  | Ted Raszka          | Appellant                       |
| 6.  | Michelle Raszka     | Appellant                       |
| 7.  | Isabel Joslen       | Opponent                        |
| 8.  | Joseph Vidra        | Opponent                        |
| 9.  | Pamela Vidra        | Opponent                        |
| 10. | Daniel Gorrell      | Opponent                        |
| 11. | Chris Bailey        | General Witness                 |

No objections were raised as to notice, jurisdiction, conflict of interest, exhibits, evidence or testimony presented at the hearing. Additional submissions were included in the record and admitted as Exhibits:

- |            |   |
|------------|---|
| Exhibit 1: | Letter from Carrie Richter                  |
| Exhibit 2: | Maps of Little Haven Lane (5 pages)         |
| Exhibit 3: | Summary of Testimony by Ted Raszka          |
| Exhibit 4: | Notice of Appeal by Joseph and Pamela Vidra |
| Exhibit 5: | Restated Roadway Access Agreement           |
| Exhibit 6: | Statement of Dan and Lois Gorrell           |

The record was held open until May 9, 2024 for the Applicant to provide additional evidence, until May 16, 2024 for the Opponents to provide additional evidence. No new evidence would be permitted after May 16, 2024. The Applicant was permitted to submit any final argument by May 23, 2024.

Attention Property Owner: A land use proposal has been submitted for property near where you live or near property you own elsewhere. State law requires that the county notify property owners within a certain distance from this property. The proposal and address of the property is described in the "Application" section below. The decision in this case does not directly affect the zoning or use of your property. If you object to the decision, refer to the "Appeal" section. If you have questions, contact the staff person listed at the end of this report.

**NOTICE OF DECISION  
CONDITIONAL USE CASE NO. 24-006**

**APPLICATION:** Application of the Joy M Blackman Revocable Living Trust to establish a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax lot 800).

**DECISION:** The Planning Director for Marion County has **APPROVED** the above-described Conditional Use application subject to certain conditions. **PLEASE READ ALL CONDITIONS BELOW.**

**EXPIRATION DATE:** This conditional use permit is valid only when exercised by **March 30, 2028**. The effective period may be extended once for two years, and then up to five more times for one year each, subject to approval of an extension (form available from the Planning Division). Request for an extension must be submitted to the Planning Division prior to expiration of the approval. **Additional extensions may not be granted if the regulations under which this decision was granted have changed since the original approval.**

**WARNING:** A decision approving the proposed use is for land use purposes only. Due to septic, well, and drain field replacement areas, this parcel may not be able to support the proposal. To ensure the subject property can accommodate the proposal the applicant should contact Building Inspection Division, (503) 588-5147.

**This decision does not include approval of a building permit.**

**CONDITIONS:** The following conditions must be met before a building permit can be obtained or the approved use established:

1. The applicant shall obtain approval for all permits, including subsurface sewage, as required by the Marion County Building Inspection Division.
2. The proposed dwelling and any future accessory structures shall maintain a **130-foot minimum setback** from the northern property line and a **100-foot minimum setback** from the western and southern property lines.
3. Prior to obtaining building permits, the applicant must provide evidence to the Planning Director that the county Assessor's Office has permanently disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.113 or ORS 308A.724 or ORS 321.359(1)(b), ORS 321.842(1)(A) and 321.716.
4. Prior to issuance of a building permit for the new dwelling, the applicants shall sign and submit a Farm/Forest & SGO & Geohazard Declaratory Statement (enclosed) to the Planning Division. This Statement shall be recorded by the applicant with the Marion County Clerk after it has been reviewed and signed by the Planning Director.
5. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry.
6. The dwelling shall be addressed **3308 Little Haven Ln S**, effective when building permits are applied for. This address is subject to change if the driveway location changes.

**OTHER PERMITS, FEES AND RESTRICTIONS:** This approval does not remove or affect covenants or restrictions imposed on the subject property by deed or other instrument. The proposed use may require permits and/or fees from other local, State or Federal agencies. This decision does not take the place of, or relieve the responsibility for, obtaining

other permits or satisfying any restrictions or conditions thereon. It is recommended that the agencies mentioned in Finding #7 under Findings and Conclusions below be contacted to identify restrictions or necessary permits. The applicant is advised of the following:

7. The applicants should contact the Salem Suburban Fire District to obtain a copy of the District's Recommended Building Access and Premise Identification regulations and the Marion County Fire Code Applications Guide. Fire District access standards may be more restrictive than County standards.
8. The applicants should contact the Marion County Assessor's Office (503-588-5144) for additional information regarding the farm/forest disqualification process (please see #10(C) in the Findings and Conclusions below).

**APPEAL PROCEDURE:** The Marion County Zone Code provides that certain applications be considered first by the County Zoning Administrator. If there is any doubt that the application conforms with adopted land use policies and regulations the Zoning Administrator must condition or deny the application. Anyone who disagrees with the decision may request that the application be considered by a County hearings officer after a public hearing. The applicant may also request reconsideration (one time only and a fee of \$200) based on new information subject to signing an extension of the 120-day time limit for review of zoning applications.

A public hearing is held on appeals subject to the appellant paying a \$250.00 fee. Requests for reconsideration, or consideration by a hearings officer, must be in writing (form available from the Planning Division) and received in the Planning Division, 5155 Silverton Rd. NE, Salem, by 5:00 p.m. on **April 1, 2024**. If you have questions about this decision, contact the Planning Division at (503) 588-5038 or at the office. This decision is effective **April 2, 2024**, unless further consideration is requested.

**FINDINGS AND CONCLUSIONS:** Findings and conclusions on which the decision was based are noted below.

1. The subject property is designated Special Agriculture in the Marion County Comprehensive Plan and correspondingly zoned SA (Special Agriculture). The primary intent of both this designation and zone is to promote and protect commercial agricultural operations while also providing the opportunity for timber production and other uses that are compatible with agricultural activities.
2. The subject parcel consists of 5.97-acres of naturally forested hillside in the rural unincorporated area of south Salem. The forested area appears to consist of a mix of evergreen and deciduous trees. The slopes on this parcel are significant, and the geohazard overlay shows particularly steep slopes wrapping around the west, east, and south sides of the parcel. A south-pointing triangular section of the parcel based across the northern property line consists of relatively mild 2-point geohazard. The parcel is also within one of Marion County's SGO (Sensitive Ground Water) overlays indicating groundwater supply may be a concern now or in the future.

The access to the subject parcel is via an undeveloped easement that utilizes tax lots 2000, 2301, and 2300. Tax lot 2300 was partitioned twice, once in 2005 and again in 2008. Both new parcels had homes developed clustered together at the end of Little Haven Ln S. Tax lot 2000 was the subject of a measure 37/49 decision that has not been exercised, allowing that parcel to create two additional parcels and develop each with a dwelling.

Currently four parcels with dwellings are addressed off Little Haven Ln S, but the dwelling on tax lot 2000 has frontage on Viewcrest Rd S. Therefore, the limitation of a private lane to not serve more than four dwelling units has not yet been met by Little Haven Ln S and the proposed non-farm dwelling on the subject parcel would be the final dwelling developable without approval of a variance to MCC 17.110.800 - *Dwellings and all other buildings to be accessible to public street.*

3. The subject parcel was created in its current formation by partition in the fall of 1978 which legitimized the sale of this parcel and the description thereof which is included in the deed recorded in January 1978 on Reel 111 Page 1041 of the Marion County Book of Land Records and is therefore legal for land use purposes.

The Major Partition case (MJP78-078) divided a 10-acre parcel in the RA (Residential Agricultural) zone (a zone no longer existing in Marion County Code) into three parcels of approximately 2-acres, 2-acres, and 6-acres. At

the time of the partition the land was jointly owned, and the partition was to accomplish division of this ownership. The subject parcel at this time was separated as described by the deed referenced above and came solely under the ownership of the Blackman family. The other two parcels created by this partition are accessed off of Inland Dr S.

When Marion County adopted an updated Comprehensive Plan in 1982 the RA (Rural Agricultural) zone was removed, and the AR (Acreage Residential) zone was applied to these two smaller parcels. At this time the subject parcel in this case (CU24-006) was changed to SA (Special Agriculture).

4. Properties directly surrounding the subject parcel to the north, west, and south are zoned SA, and parcels to the east are zoned AR. The adjacent AR parcel tract extends to the City of Salem UGB which is a half-mile to the east. The UGB is also a half-mile north of the subject parcel. Some of the SA parcels around the subject parcel have woodlots and most of those are simultaneously in use for rural residences. Many of the SA parcels around the subject parcel are solely in use for rural residences. A half-mile to the west is a large tract of AR zoned parcels that stretches to the Willamette River and western county line. Just over a half mile to the north of the subject parcel is the Illahe neighborhood within the City of Salem UGB. Between the subject parcel and Illahe are a couple SA zoned parcels under 10-acres with a couple acres each of personal orchards and/or fields for a few livestock animals. Half a mile to the south is another tract of AR zoned parcels that transitions into a few SA parcels in the same rural residential use off the same access road (Ballyntyne).

A quarter-mile west of the subject parcel is a 30-acre parcel with similar forest composition to the subject parcel. This 30-acre parcel had a wildlife habitat conservation plan approved in 2002 by AR02-055. The two parcels east of the habitat conservation area were both covered with timber forests up until 2016. Between 2016 and 2019 most of the trees (approx. 20 acres) were harvested on tax lot 100 which meets the subject parcel on its southwest corner. This area has been replanted but it is unclear from aerial photos if the replant was for Christmas tree or timber production. Between 2021 and 2023 about half of the trees (approximately 15-acres) were harvested on tax lot 1300, which is adjacent to the subject parcel on its southern property line. Based on aerial photos and the applicant statement, the clear-cut on tax lot 1300 has not been replanted. Due to the tree coverage and steep slopes on the subject parcel, the proposed homesite is screened and separated from these southern operations. North-adjacent to the subject parcel is a 10-acre stand of timber that may be harvested at a future date.

The most common agricultural use of the nearby SA parcels is production of Christmas trees. Just under a mile to the south of the subject parcel, on the other side of another tract of AR zoned parcels, is a nearly 200-acre parcel in use for grass seed or hay production. This is the closest parcel in commercial agriculture use. Farther to the south (2+ miles south of the subject parcel) are larger SA parcels in clear commercial agricultural use. The predominant land use around the subject parcel is for rural residences.

5. Marion County Soil Survey reports approximately 47.1% of the soils on the subject property as high value. The analysis lists a breakdown of the soils as follows:

<u>Soil Name</u>	<u>Soil Type</u>	<u>Soil Class</u>	<u>High Value</u>	<u>Soil Percent</u>	<u>Soil Acres</u>
Nekia silty clay loam 2-7% slopes	NeB	3	Yes	47.0%	2.8 acres
Nekia silty clay loam 20%-30% slopes	NeE	4	No	38.6%	2.3 acres
Nekia silty clay loam 30-50% slopes	NeF	6	No	14.3%	0.9 acres

6. The applicant proposes to establish a non-farm dwelling on the property.
7. Various agencies were contacted about the proposal and given an opportunity to comment.

Marion County Land Development Engineering & Permits requested the following be included in the staff decision:

**ENGINEERING REQUIREMENTS**

- A. At the time of application for building permits an Access Permit will be required for obtaining access at the private access easement Little Haven Lane connection to public road Viewcrest Road.
- B. The subject property will be assessed Transportation & Parks System Development Charges (SDCs) upon application for building permits.
- C. Utility work in the public right-of-way requires separate PW Engineering permits.

**ENGINEERING ADVISORY**

- D. The applicant should coordinate with the local Fire Department to confirm any Emergency Vehicle Access requirements given the fact that Little Haven Lane is quite narrow.

Marion County Building Inspection commented: “No Building Inspection concerns. Permits are required to be obtained prior to development and/or utilities installation on private property. Depending on site conditions and proposed home location, a geotechnical assessment of soils and slopes for adequate support of the home may be required during plan review.”

Marion County Septic Division commented: “A septic site evaluation is required to establish a viable initial and repair area. A site evaluation may be applied for at the Marion County Public Works campus building 1.”

City of Salem Fire Department commented: “Items including fire department access and water supply will be required per the Oregon Fire Code at the time of development.”

All other contacted agencies either failed to comment or stated no comment or no objection to the proposal.

- 8. The following code, 17.137.060(A), applies to all conditional uses in the SA zone:

*1. The use will not force a significant change in, or significantly increase the cost of, accepted farm or forest practices on surrounding lands devoted to farm or forest use. Land devoted to farm or forest use does not include farm or forest use on lots or parcels upon which a non-farm or non-forest dwelling has been approved and established, in exception areas approved under ORS 197.732, or in an acknowledged urban growth boundary.*

The access to, and location of, the proposed dwelling will cluster it with adjacent rural residential uses. The 130-foot setback from the northern property line will create a buffer between the proposed dwelling and the stand of timber to the north. The access to the subject parcel is achieved through an existing, although undeveloped, easement extending Little Haven Ln S across AR zoned parcels with dwellings. There are no adjacent agricultural uses that could be disturbed by the proposed placement of a non-farm dwelling.

A farm/forest declaratory statement will be a condition of approval to ensure the property owner, and future owners, of the subject parcel are aware that the priority of the SA zone is agricultural and/or timber uses, and that owners and inhabitants of the proposed non-farm dwelling shall not infringe, inhibit, or complain about the effects of these uses on the subject dwelling.

Considering the above factors staff has determined that the use of the subject parcel for siting a non-farm dwelling using the existing easement to access the proposed building area with the modified setbacks of 130-feet to the north and 100-feet to the east, west, and south, will not cause change in, or significantly increase the cost of, farm or forest uses on surrounding parcels in the area. The criterion is met.

*2. Adequate fire protection and other rural services are, or will be, available when the use is established.*

The subject parcel is served by the Salem Suburban Fire District and the Marion County Sheriff's Department. As per comment from the Salem Fire Department, fire department access and water supply will be required prior to development. Electrical service, provided by PGE, is available on Little Haven Ln S and could be extended via the undeveloped easement that travels over parcels 083W07A002000, 083W07A002301, and 083W07A002300 to the subject parcel. Permits for a well will need to be filed for with the Oregon Water Resources Department. Permits related to a septic system will need to be filed with Marion County Septic Division. Staff has no reason to believe that all required rural services will not be able to be attained in order for the proposed dwelling to be established. The criterion is met.

*3. The use will not have a significant adverse impact on watersheds, groundwater, fish and wildlife habitat, soil and slope stability, air and water quality.*

The applicant attests that most of the parcel will be left wooded because harvesting the timber on this property is cost-prohibitive due to the slopes present. Development of access, and fuel breaks will require some timber be harvested. Due to those geohazards on this property, the site of the proposed dwelling is limited to an area in the middle northern section of the property. Siting the proposed dwelling on this area of the property is not expected to have any deleterious effect on the soils or slope stability. The subject parcel is not within the Big Game Overlay. This property is within the Sensitive Groundwater Overlay and a Declaratory Statement acknowledging this will be a condition of approval. The criterion is met.

*4. Any noise associated with the use will not have a significant adverse impact on nearby land uses.*

Any noise associated with the proposed development, post-construction, will be the normal noise of a dwelling in residential use. Based on the proposed site, the nearest dwellings will be over 500 feet away and shielded by trees. Any noise created by this dwelling will not have an adverse impact on the nearby land uses. The criterion is met.

*5. The use will not have a significant adverse impact on potential water impoundments identified in the Comprehensive Plan, and not create significant conflicts with operations included in the Comprehensive Plan inventory of significant mineral and aggregate sites.*

There are no water impoundments on or near the subject property, nor are there any aggregate sites in the surrounding area. The criterion does not apply.

9. Non-farm dwellings are subject to MCC Section 17.137.050(A). One of the requirements is that the proposed dwelling meet the provisions listed in 17.137.060(B), which reads as follows:

*B. Non-Farm Dwellings. The following additional criteria apply to non-farm dwelling requests:*

*1. The dwelling will be sited on a lot or parcel that is predominantly composed of Class IV through Class VIII soils that would not, when irrigated, be classified as prime, unique, Class I or Class II soils. Soils classifications shall be those of the Soil Conservation Service in its most recent publication, unless evidence is submitted as required in MCC 17.136.130.*

Marion County Soils Analysis, based on NRCS (Natural Resources Conservation Service) soil data, reports that the subject parcel is composed of 52.9% non-high value soils consisting of respectively 38.6% NeE (Nekia silty clay loam with 20%-30% slopes) which is a Class IV soil and 14.3% NeF (Nekia silty clay loam with 30%-50% slopes) which is a Class VI soil. Nekia silty clay loam classifications with slopes above 20% are not listed on the NRCS table of high value soils when irrigated in Marion County. The criterion is met.

*2. The dwelling will be sited on a lot or parcel that does not currently contain a dwelling and was created before January 1, 1993. The boundary of the lot or parcel cannot be changed after November 4, 1993, in any way that enables the lot or parcel to meet the criteria for non-farm dwelling.*

The parcel was created by partition (MJP78-078) in 1978 to legitimize the description of the property as conveyed in a deed recorded earlier the same year on Reel 111 Page 1041 of the Marion County Book of Land Records and has existed in this configuration ever since then. The property does not contain a dwelling. The criterion is met.

*3. The dwelling will not materially alter the stability of the overall land use pattern of the area. In making this determination the cumulative impact of possible new non-farm dwellings on other lots or parcels in the area similarly situated shall be considered. To address this standard, the following information shall be provided:*

*(a) Identify a study area for the cumulative impact analysis. The study area shall include at least 2,000 acres or a smaller area not less than 1,000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other, adjacent agricultural areas. Findings shall describe the study area, its boundaries, the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or non-resource uses shall not be included in the study area;*

The applicant provided a study area encompassing 2,000-acres of surrounding land. This study area included only properties zoned for Farm Use. Lands zoned for rural residential or other non-resource uses were excluded. Information supplied by the applicant, and verified by staff, indicates that there is no non-resource zoned land applied to the study area and that the applicant's report meets the required area for resource zone analysis.

The applicant has indicated this study area is representative of the land use pattern surrounding the subject parcel. Uses within the study area include rural residences, timber lots, natural woods, Christmas tree lots, and fields of row crops. Staff concludes that the area presented by the applicant is a fair representation of the surrounding area and is sufficient to arrive at a sampling of the land use pattern.

*(b) Identify within the study area the broad types of farm uses (irrigated or non-irrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm dwellings that could be approved under MCC 17.136.050(A), including identification of predominant soil classifications and parcels created prior to January 1, 1993. The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible non-farm dwellings under this provision;*

The subject parcel is within an area near the edge of the City of Salem UGB, an area which contains several large tracts of Acreage Residential zoned parcels. As a result, the 2,000-acre study area creates a meandering shape that wraps around these tracts and extends around and above peninsulas of residential-neighborhoods. The largest contiguous space of the study area exists in the southern half.

The applicant noted that due to the steep slopes and low value soil, most of the parcels included in the 2,000-acre study area have woodlots and are not in agricultural use. Based on Marion County aerial photographs of the region, very few of the woodlots appear to be intentionally planted stands of timber. One of the stands is directly north adjacent to the subject parcel. South adjacent is a clearcut that occurred between 2021 and 2023. Southwest adjacent of the subject parcel was a clear cut from between 2016-2019 that has been replanted. It is unclear from aerial photographs if this parcel has been replanted with timber or with Christmas trees. Roughly half of the wooded areas within the study area are covered with deciduous trees and irregularly growing evergreen trees. These naturally wooded areas are not considered to be in timber use. The largest stands of timber range from 10-15 acres and are on properties that contain dwellings.

The most common agricultural use in the study area appears to be for the purpose of harvesting Christmas trees. The largest Christmas tree operation in the area is only partially within the study area. The entire operation consists of approximately 60-acres of Christmas trees planted across 3-parcels which total over 200-acres. This operation is on the southernmost edge of this 2000-acre study, and less than half of the total operation is within the study area.

The largest single parcel in agricultural use is also on the southernmost edge of the 2000-acre study. This parcel is almost 200-acres and has 127-acres devoted to grass seed or hay production, and 20-acres devoted to Christmas trees. It is worth noting that a few acres of the Christmas tree lot falls outside of the study area. The other two large parcels in agricultural use are both on the northernmost edge of the 2000-acre study area. These parcels are contiguous and along the Willamette River north of Illahe. One is 97-acres, and the other is 182-acres, both appear in use for row crops. The northernmost parts of the 182-acre parcel falls outside of the study area.

A total of 137 parcels were included in the study area. Of these included parcels, 124 are zoned SA and 13 are zoned EFU. Only five parcels in the study area are larger than the minimum 80-acres for SA and EFU zoned parcels. 60% of the parcels are under 10-acres in size.

Of the parcels included in the study area, 92 have at least one dwelling and there are a total of 101 dwellings on these 92 parcels. 84 of those parcels had a dwelling prior to 1993. A total of 8 parcels have been developed with homesites in the last 30 years. Since 1993, four non-farm dwellings have been approved within the study area. Three of these were approved in the 90s, and the fourth in 2004. Also, since 1993, three lot of record dwellings were approved, and three replacement dwellings were approved. While not permanent, four hardship dwellings have been approved in the study area since 1993.

Staff found seven parcels within the study area that have neither a dwelling nor predominantly high value soils. These parcels would therefore potentially be able to qualify for additional non-farm dwellings. However, five of these parcels were involved in Measure 37/49 claims. As a result, these parcels would develop single family dwellings as a result of their Measure 49 decisions, and not through application for non-farm dwellings. A total of seven dwellings may result from these Measure 49 orders. The remaining two parcels that could potentially qualify for non-farm dwellings are both of relatively large sizes and in timber use.

The applicant contends that the most common use of parcels within the study area is for rural residential purposes, and that allowing development of a single-family dwelling on the subject parcel would not destabilize the less common farm and timber uses in the area. The commercial agricultural uses within the study area are restricted to the northern and southern most parcels, all three of these operations are 0.7-0.9 miles from the subject parcel on the other side of rural residential clusters. The proposed dwelling would be consistent with the development pattern that has occurred on the SA and EFU parcels surrounding the subject parcel.

*(c) Determine whether approval of the proposed non-farm dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase, or lease farmland, or acquire waste rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.*

Approval of this application would bring the total number of post-1993 non-farm dwellings within the study area to five. The subject parcel is 5.97-acres and would fit within the current land use pattern of small acreage homesites scattered through the area. The subject parcel has never had a dwelling not been involved in agricultural use.

If the other two parcels that could potentially develop non-farm dwelling were able to do so, they would not be able to materially alter the land-use pattern in the area. The dominant land-use pattern in this area is for rural residential use and has been for more than 30 years.

The proposed dwelling would be built within an existing cluster of residences, accessed on private lane that serves adjacent AR zoned parcels. The proposed dwelling site would be shielded by trees and topography from adjacent SA zoned parcels. These adjacent parcels while involved in timber use, do not appear to be involved in agricultural uses. The access and isolation of the proposed dwelling shield it from the scattered agricultural use of Christmas tree production in the area. The parcels in the study area involved in row crop production are all on the other side of residential neighborhoods from the subject parcel, so it is unreasonable to say that the proposed dwelling will have any effect on those farming operations. It is staff's conclusion that based on the above factors, there would be little to no effect on existing farming in this area.

Staff deems the cumulative impact analysis submitted by the applicant as acceptable and complete and concludes that the applicant's conclusions based on the analysis are sound. Therefore, staff determines that the criteria of MCC 17.137.060(B)(3) are met.

10. In addition, non-farm dwellings shall be subject to the following code as provided for in 17.137.070, Non-farm dwelling requirements:

*(A) Special Setbacks.*

*1. Dwellings. A special dwelling setback of 200 feet from any abutting parcel in farm use or timber production is required.*

*2. Accessory Buildings. A special setback of 100 feet is required for buildings accessory to a dwelling from any abutting parcel in farm use or timber production.*

*3. Adjustments. The special setbacks in subsections (A)(1) and (2) of this section may be reduced if it is determined, concurrently with any land use application or as provided in Chapter 17.116 MCC, that a lesser setback will meet the following review criteria for alternative sites:*

*a. The site will have the least impact on nearby or adjoining forest or agricultural lands.*

*b. The site ensures that adverse impacts on forest operations and accepted farming practices on the tract will be minimized.*

*c. The amount of agricultural and forestlands used to site access roads, service corridors, the dwelling and structures is minimized.*

*d. The risks associated with wildfire are minimized.*

The applicant has proposed reducing the setbacks from 200-feet to 100-feet considering the dimensions of the property (an imperfect square of approximately 500 by 500-feet) and the significant slopes which create geohazard areas across much of the eastern, western, and southern sides of the parcel. The most reasonable buildable area is the middle of the northernmost third of the parcel. This area is closest to where the easement enters the property and is the flattest area, though still within the geohazard 2-point overlay. This site would put the proposed dwelling potentially 100-feet from the timber lot directly north-adjacent to the subject property. The applicant would have to sign a farm/forest declaratory statement as a condition of approval, in which they would recognize these timber uses are a priority above a non-farm dwelling in this zone and shall not be interfered with or complained about.

The proposed location would allow for the existing easement to be used, which would travel over AR zoned land that is not being used for agricultural or timber purposes. The subject parcel is served by the Salem Suburban Fire District and will comply with all relevant fire district code imposed by the SSFD.

It is generally considered prudent to have 2-acres to be able to site a dwelling, septic tank and drainfield, replacement drainfield area, and a well. If the 200-foot setbacks were imposed, the practical buildable area would be roughly a quarter of an acre. The buildable area increases to almost 1-acre with the proposed 100-foot setbacks. The prohibitive geohazard slopes present on the eastern, western, and southern portions of this property make the northern setback the primary variable in potentially developable space on this parcel.

The northern parcel has a 10-acre stand of timber directly adjacent to the subject parcel. Depending on how the applicant implements the fuel breaks imposed by 17.137.070(B), the effective setback from the northern parcel will end up being at least 130-feet. The primary safety zone is 30 feet around all structures, with some slope related extensions that may affect this property depending on the siting of the proposed dwelling. The secondary fuel break area is 100-feet around the primary safety zone. The secondary fuel break area requires pruned and spaced vegetation so that fire would not spread between the crowns of trees, or between trees via vegetation between them.

To reduce the setback on the northern parcel below 130ft would conflict with the criteria of 17.137.070(A)(3)(d) and 17.137.070(B)(3) due to the requirements to meet the primary and secondary fuel break areas.

Staff has determined that a reduced special setback of 130-feet from the northern property line, and 100-feet from the western and southern property lines for the proposed dwelling and any future accessory structures would maintain the intent of the Special Setback Code and meet the criteria in subsection (A)(3)(a-d). The special setbacks do not apply to the eastern property line adjacent to parcels in the AR zone. These criteria are met.

*4. The special setback in subsection (A)(1) of this section shall not be applied in a manner that prohibits dwellings approved pursuant to ORS 195.300 through 195.336 nor should the special setback in subsection (A)(1) of this section prohibit a claimant's application for homesites under ORS 195.300 through 195.336.*

The proposed dwelling is not subject to/a part of a Measure 37 or 49 claim. The criterion does not apply.

- (B) *Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to provide continuing fire hazard management in accordance with Chapter 3 of "Fire Safety Consideration for Development in Forested Area," 1978, and any revisions thereto.*

The updated version of the standards within the document above is referenced in the EFU-equivalent of this section of code: 17.136.070 (B). "Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200-feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry."

The property north of the subject parcel has approximately 10-acres devoted to timber production directly adjacent to the subject parcel. The primary and secondary fuel-free break areas shall be conditions of approval. The criterion is met.

- (C) *Prior to issuance of any residential building permit for an approved non-farm dwelling under MCC 17.136.050(A), evidence shall be provided that the county assessor has disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been*

*imposed, if any is applicable, as provided by ORS 308A.113 or 308A.724 or 321.359(1)(b), 321.842(1)(A) and 321.716. A parcel that has been disqualified under this section shall not requalify for special assessment unless, when combined with another contiguous parcel, it constitutes a qualifying parcel.*

The criterion can be met with a condition of approval: the applicant shall submit evidence to Marion County Planning that the property has been disqualified from farm/forest deferral by the Marion County Tax Assessor's Office prior to Planning approval of a building permit. The criterion is met.

11. Finally, non-farm dwellings must also meet the standards in MCC 17.137.100, which are listed below:

(A) *Maximum Height.*

1. *Dwellings: 35 feet.*
2. *Farm-related structures on farm parcels: none.*
3. *Nonresidential and non-farm structures: 35 feet unless they are in conjunction with conditional uses allowed in MCC 17.137.050, and a greater height is requested and approved as part of the conditional use permit.*

Compliance with this shall be verified at the time of building permits. The criteria are met.

(B) *Minimum Setbacks. Except as required in MCC 17.137.070(A), the following setback requirements shall be implemented for all new structures other than farm-exempt buildings, signs and fences:*

1. *Rear Yard. A minimum of 20 feet.*
2. *Side Yard. A minimum of 20 feet, except for lots or parcels of one-half acre or smaller created prior to January 1, 1994, in which case the side yard setback shall be five feet.*
3. *Front Yard. A minimum of 20 feet. When by ordinance a greater setback or a front yard of greater depth is required than specified in this section, then such greater setback line or front yard depth shall apply (See Chapter 17.112 MCC).*

The dwelling and any future accessory structures shall be subject to MCC 17.137.070(A), as adjusted in the conditions of approval. Therefore, these criteria do not apply.

(C) *Declaratory Statement. For all dwellings, and other uses deemed appropriate, the property owner shall be required to sign and allow the entering of the following declaratory statement into the chain of title of the lot(s) or parcel(s):*

*"The property herein described is situated in or near a farm or forest zone or area in Marion County, Oregon, where the intent is to encourage, and minimize conflicts with, farm and forest use. Specifically, residents, property owners and visitors may be subjected to common, customary and accepted farm or forest management practices conducted in accordance with federal and state laws that ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantors, including their heirs, assigns and lessees do hereby accept the potential impacts from farm and forest practices as normal and necessary and part of the risk of establishing a dwelling, structure or use in this area, and acknowledge the need to avoid activities that conflict with nearby farm and forest uses and practices, grantors will not pursue a claim for relief or course of action alleging injury from farming or forest practice for which no action is allowed under ORS 30.936 or 30.937."*

This shall be made a condition of approval. The criterion is met.

12. Based on the above discussion, the applicant has adequately addressed all applicable criteria for placing a non-farm dwelling on the parcel. Therefore, subject to meeting the conditions of approval, the application for a non-farm dwelling is **APPROVED**.

Brandon Reich  
Planning Director/ Zoning Administrator

Date: March 15, 2024

If you have any questions regarding this decision contact John Speckman at (503) 588-5038.

Notice to Mortgagee, Lienholder, Vendor or Seller: ORS Chapter 215 requires that if you receive this Notice, it must promptly be forwarded to the purchaser.

BEFORE THE MARION COUNTY HEARINGS OFFICER

In the Matter of the Application of: ) Case No. CU 24-006  
)  
JOY BLACKMAN REVOCABLE TRUST ) **CONDITIONAL USE**

**I. Nature of the Application**

This matter is before the Marion County Hearings Officer on the Application of the Joy Blackman Revocable Living Trust for a Conditional Use to establish a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax lot 800).

**II. Relevant Criteria**

Standards and criteria relevant to this Application are found in the Marion County Code, Title 17, especially Marion County Code: Chapter 17.137 Special Agriculture Zone.

**III. Public Hearing**

A public hearing was held on this matter on May 2, 2024. The Planning Division file was made part of the record. The following persons appeared and provided testimony at the hearing:

- |     |                     |                                 |
|-----|---------------------|---------------------------------|
| 1.  | John Speckman       | Marion County Planning Division |
| 2.  | Mike Paluska        | Attorney for Applicant          |
| 3.  | Carrie Richter      | Attorney for Appellant          |
| 4.  | Mary Judith Upright | Appellant                       |
| 5.  | Ted Raszka          | Appellant                       |
| 6.  | Michelle Raszka     | Appellant                       |
| 7.  | Isabel Joslen       | Opponent                        |
| 8.  | Joseph Vidra        | Opponent                        |
| 9.  | Pamela Vidra        | Opponent                        |
| 10. | Daniel Gorrell      | Opponent                        |
| 11. | Chris Bailey        | General Witness                 |

No objections were raised as to notice, jurisdiction, conflict of interest, exhibits, evidence or testimony presented at the hearing. Additional submissions were included in the record and admitted as Exhibits:

- |            |   |
|------------|---|
| Exhibit 1: | Letter from Carrie Richter                  |
| Exhibit 2: | Maps of Little Haven Lane (5 pages)         |
| Exhibit 3: | Summary of Testimony by Ted Raszka          |
| Exhibit 4: | Notice of Appeal by Joseph and Pamela Vidra |
| Exhibit 5: | Restated Roadway Access Agreement           |
| Exhibit 6: | Statement of Dan and Lois Gorrell           |

The record was held open until May 9, 2024 for the Applicant to provide additional evidence, until May 16, 2024 for the Opponents to provide additional evidence. No new evidence would be permitted after May 16, 2024. The Applicant was permitted to submit any final argument by May 23, 2024.

On May 16, 2024, on behalf of Mary Judy Upright, Carrie Richter submitted additional written arguments. On May 23, 2024, on behalf of the Applicant, Michael Paluska submitted final written arguments.

#### **IV. Executive Summary**

The Applicant seeks a conditional use permit to place a non-farm dwelling on a 5.97-acre parcel in the SA (Special Agriculture) zone located in the 3300 block of Little Haven Lane S, Salem (T8S; R3W; Section 7B; Tax lot 800). The subject property has remained under the ownership of the same family for nearly 50 years, and the proposed dwelling would remain in the family. Although the Applicant satisfies the criteria to allow the establishment of a non-farm dwelling on the subject property, extending the use of Little Haven Lane for use by five homes exceeds the threshold permitted by MCC 17.110.800. Without a variance, the Application is DENIED.

#### **V. Findings of Fact**

The Hearings Officer, after careful consideration of the testimony and evidence in the record, issues the following findings of fact:

1. The subject property is designated Special Agriculture in the Marion County Comprehensive Plan and correspondingly zoned SA (Special Agriculture). The primary intent of both this designation and zone is to promote and protect commercial agricultural operations while also providing the opportunity for timber production and other uses that are compatible with agricultural activities.
2. The subject parcel consists of 5.97-acres of naturally forested hillside in the rural unincorporated area of south Salem. The forested area appears to consist of a mix of evergreen and deciduous trees. The slopes on this parcel are significant, and the geohazard overlay shows particularly steep slopes wrapping around the west, east, and south sides of the parcel. A south-pointing triangular section of the parcel based across the northern property line consists of relatively mild 2-point geohazard. The parcel is also within one of Marion County's SGO (Sensitive Ground Water) overlays indicating groundwater supply may be a concern now or in the future.

The access to the subject parcel is via an undeveloped easement that utilizes tax lots 2000, 2301, and 2300. Tax lot 2300 was partitioned twice, once in 2005 and again in 2008. Both new parcels had homes developed clustered together at the end of Little Haven Ln S. Tax lot 2000 was the subject of a measure 37/49 decision that has not been exercised, allowing that parcel to create two additional parcels and develop each with a dwelling.

3. The subject parcel was created in its current formation by partition in the fall of 1978 which legitimized the sale of this parcel and the description thereof which is included in the deed recorded in January 1978 on Reel 111 Page 1041 of the Marion County Book of Land Records and is therefore legal for land use purposes.

The Major Partition case (MJP78-078) divided a 10-acre parcel in the RA (Residential Agricultural) zone (a zone no longer existing in Marion County Code) into three parcels of approximately 2-acres, 2-acres, and 6-acres. At the time of the partition the land was jointly owned, and the partition was to accomplish division of this ownership. The subject parcel at this time was separated as described by the deed referenced above and came solely under the ownership of the Blackman family. The other two parcels created by this partition are accessed off of Inland Dr S.

When Marion County adopted an updated Comprehensive Plan in 1982 the RA (Rural Agricultural) zone was removed, and the AR (Acreage Residential) zone was applied to these two smaller parcels. At this time the subject parcel in this case (CU24-006) was changed to SA (Special Agriculture).

4. Properties directly surrounding the subject parcel to the north, west, and south are zoned SA, and parcels to the east are zoned AR. The adjacent AR parcel tract extends to the City of Salem UGB which is a half-mile to the east. The UGB is also a half-mile north of the subject parcel. Some of the SA parcels around the subject parcel have woodlots and most of those are simultaneously in use for rural residences. Many of the SA parcels around the subject parcel are solely in use for rural residences. A half-mile to the west is a large tract of AR zoned parcels that stretches to the Willamette River and western county line. Approximately one-half mile to the north of the subject parcel is the Illahe neighborhood within the City of Salem UGB. Between the subject parcel and Illahe are a couple SA zoned parcels under 10-acres with a couple acres each of personal orchards and/or fields for a few livestock animals. Half a mile to the south is another tract of AR zoned parcels that transitions into a few SA parcels in the same rural residential use off the same access road (Ballyntyne).

A quarter-mile west of the subject parcel is a 30-acre parcel with similar forest composition to the subject parcel. This 30-acre parcel had a wildlife habitat conservation plan approved in 2002 by AR02-055. The two parcels east of the habitat conservation area were both covered with timber forests up until 2016. Between 2016 and 2019 most of the trees (approx. 20 acres) were harvested on tax lot 100 which meets the subject parcel on its southwest corner. This area has been replanted but it is unclear from aerial photos if the replant was for Christmas tree or timber production. Between 2021 and 2023 about half of the trees (approximately 15-acres) were harvested on tax lot 1300, which is adjacent to the subject parcel on its southern property line. Based on aerial photos and the applicant statement, the clear-cut on tax lot 1300 has not been replanted. Due to the tree coverage and steep slopes on the subject parcel, the proposed homesite is screened and separated from these southern operations. North-adjacent to the subject parcel is a 10-acre stand of timber that may be harvested at a future date.

The most common agricultural use of the nearby SA parcels is production of Christmas trees. Just under a mile to the south of the subject parcel, on the other side of another tract of AR zoned parcels, is a nearly 200-acre parcel in use for grass seed or hay production. This is the closest parcel in commercial agriculture use. Farther to the south (2+ miles south of the subject parcel) are larger SA parcels in clear commercial agricultural use. The predominant land use around the subject parcel is for rural residences.

5. Marion County Soil Survey reports approximately 47.1% of the soils on the subject property as high value. The analysis lists a breakdown of the soils as follows:

<u>Soil Name</u>	<u>Soil Type</u>	<u>Soil Class</u>	<u>High Value</u>	<u>Soil Percent</u>	<u>Soil Acres</u>
Nekia silty clay loam 2-7% slopes	NeB	3	Yes	47.0%	2.8 acres
Nekia silty clay loam 20%-30% slopes	NeE	4	No	38.6%	2.3 acres
Nekia silty clay loam 30-50% slopes	NeF	6	No	14.3%	0.9 acres

6. The applicant proposes to establish a non-farm dwelling on the property.

7. The Marion County Planning Division requested comments on the Application from various governmental agencies.

Marion County Public Works Land Development and Engineering Permits (LDEP) commented:

**ENGINEERING REQUIREMENTS**

- A. At the time of application for building permits an Access Permit will be required for obtaining access at the private access easement Little Haven Lane connection to public road Viewcrest Road.
- B. The subject property will be assessed Transportation & Parks System Development Charges (SDCs) upon application for building permits.
- C. Utility work in the public right-of-way requires separate PW Engineering permits.

**ENGINEERING ADVISORY**

- D. The applicant should coordinate with the local Fire Department to confirm any Emergency Vehicle Access requirements given the fact that Little Haven Lane is quite narrow.

Marion County Building Inspection commented:

“No Building Inspection concerns. Permits are required to be obtained prior to development and/or utilities installation on private property. Depending on site conditions and proposed home location, a geotechnical assessment of soils and slopes for adequate support of the home may be required during plan review.”

Marion County Septic Division commented:

“A septic site evaluation is required to establish a viable initial and repair area. A site evaluation may be applied for at the Marion County Public Works campus building 1.”

City of Salem Fire Department commented:

“Items including fire department access and water supply will be required per the Oregon Fire Code at the time of development.”

All other contacted agencies either failed to comment or stated no comment or no objection to the proposal.

8. Marion County Planning states that currently four parcels with dwellings are addressed off Little Haven Lane. Marion County has interpreted MCC 17.110.800 to allow a property that has frontage on a public street to be considered to have direct access to the abutting public street even if the property uses a private driveway for access. Planning posits that the dwelling on Tax Lot 2000 has frontage on Viewcrest Rd S so the private drive does not “serve” Tax Lot 2000. Based on the frontage on Viewcrest Road S., the limitation of a private lane to not serve more than four dwelling units has not yet been met by Little Haven Ln S. Planning states that the proposed non-farm dwelling on the subject parcel would be the final dwelling developable without approval of a variance to MCC 17.110.800 - *Dwellings and all other buildings to be accessible to public street.*

CU 24-006 – ORDER

Joy M. Blackman Revocable Living Trust

Page 4

9. Appellants and Opponents argue that MCC 17.110.800 limits the use of a private drive to serve development as follows:

*Every dwelling shall be situated on a lot having direct access by abutting upon a public street or a preexisting driveway of a width not less than 20 feet. A private drive shall not serve more than four dwelling units unless the parcels, on which those units are proposed to be placed, were established with the approval of Marion County in accordance with state law and Marion County ordinances prior to May 1, 1977, or were approved under Chapter 17.121 MCC, Planned Development.*

Appellant argues that the only direct access for the homes on tax lots 2000, 2300, 2301, and 2302 is through Little Haven Lane and that Little Haven Lane already serves four units, or the maximum capacity allowed by the Code. Although Lot 2000 abuts Viewcrest Drive, it is “served” or accessed by Little Haven Lane because Viewcrest Drive does not, and perhaps could not provide direct access.

10. Carrie Richter, attorney for Appellant, testified that the easement serves Tax Lot 2000, and because the easement is there, it cannot be concluded that Viewcrest provides access to Tax Lot 2000 and no driveway could be built from Viewcrest to serve Tax Lot 2000. Ms. Richter argues there are already four homes that are served by Little Haven Lane, and that a fifth home on the subject property cannot be established without a variance. The Appellant’s positions are supported by Ms. Richter’s May 2 and May 16 submissions, as well as testimony presented at the hearing. Ms. Upright’s appeal states that she has approached Planning regarding partitioning her land, but has been advised that adding a fifth dwelling with service on Little Haven Lane would be prohibited by MCC 17.110.800.

Ms. Richter and the Opponents address the fact that to allow the use of the subject property for the establishment of a non-farm dwelling relies on obtaining vehicular access to the property by using the existing Little Haven Lane private drive and by extending it approximately twice the distance of its current length which will require significant tree removal on a steep slope behind Tax Lots 2300 and 2301.

11. Appellants Ted and Michelle Raszka reside at 3238 Little Haven Lane, which is Tax Lot 2301. The Raszkas addressed their concerns that there are already four houses accessed by Little Haven Lane. The Raszkas stated that Tax lot 2000 does not have the ability to accommodate access to Viewcrest Drive, even though it has frontage. The Raszkas also indicated that the undeveloped access road is approximately 5-10 feet wide and widening the roadway would require excavation. The access beyond the easement area that serves the residences had not been used for decades. The Raszkas state that development of the undeveloped access roadway to access the proposed dwelling will require excavation on sloped and landslide area could result in geologic consequences to the area.
12. Joseph and Pamela Vidra reside at 3288 Little Haven Lane, which is Tax Lot 2300. The Vidras’ opposition to the application is based upon the fact that four dwellings are already served by Little Haven Lane and the fact that the engineering challenges of access to the proposed dwelling have not been adequately addressed. The Vidras are concerned about a slide risk to their home and state that a significant retaining wall would be required for the slope. The Vidras stated that there will be land destabilization from tree removal that would be required to develop the roadway. The Vidras submitted Exhibit 4 which addresses the engineering challenges associated with creating the easement road on Tax Lot 2300. Exhibit 4 also addresses the Restated Roadway Access and Easement Agreement (Exhibit 5) which provides that the “ungraveled easement” is approved for emergency use only.

13. Mary Judith Upright testified that she resides at 3197 Little Haven Lane, which is Tax lot 2000. Ms. Upright states that four houses are already served by Little Haven Lane and that she had been advised by Marion County that she could not partition her property for another dwelling because of the limitation of MCC 17.110.800.
14. Isabel Joslen testified that her daughter will be marrying Ms. Upright's grandson, and in considering a home for them, they went to Marion County Planning and were told that no house could be built near Ms. Upright's home because there are already four houses served by Little Haven Lane.
15. Daniel Gorrell testified that he lives at 3298 Little Haven Lane. Mr. Gorrell testified that Little Haven Lane is a single lane, gravel road that enters Viewcrest on a blind corner. Mr. Gorrell testified that there have been multiple accidents and crashes into the mailboxes. Mr. Gorrell testified that Little Haven Lane is not well-equipped to serve the houses that are presently served by Little Haven Lane, and the introduction of a fifth dwelling to be served by Little Haven Lane would increase the inherent danger. Exhibit 6 also includes a written statement by Mr. Gorrell in opposition to the Application.
16. Michael Paluska indicated the Applicant appreciates the concerns of the neighbors and wants a safe roadway for all the properties. However, because the road has not been built, it is not known if doing so is prohibitive. Mr. Paluska states that "difficulty" in improving the access does not indicate "impossibility" to improve the access. Mr. Paluska also notes that the criteria does not require the exact location of road construction for a conditional use permit and that permitting will address the issues associated with extension of the easement.

#### **VI. Additional Findings of Fact and Conclusions of Law**

1. Applicant has the burden of proving all applicable standards and criteria apply as explained in *Riley Hill General Contractor, Inc. v. Tandy Corporation*, 303 Or 390, 394-395(1987).

"Preponderance of the evidence" means the greater weight of evidence. It is such evidence that when weighed with that opposed to it, has more convincing force and is more probably true and accurate. If, upon any question in the case, the evidence appears to be equally balanced, or if you cannot say upon which side it weighs heavier, you must resolve that question against the party upon whom the burden of proof rests. (Citation omitted).

Applicants must prove, by substantial evidence in the record, it is more likely than not that each criterion is met. If the evidence for any criterion is equal or less, Applicants have not met their burden and the application must be denied. If the evidence for every criterion is even slightly in Applicants' favor, the burden of proof is met and the application is approved.

2. Under MCC 17.119.100, the Planning Director has the power to decide applications for conditional uses. The Planning Director decided this matter on March 15, 2024.

Under MCC 17.119.140, after the Planning Director's action on the application, interested persons may appeal the decision no later than 15 days after the decision is mailed. The Planning Director's approval was dated March 15, 2024. Appellant Mary Judy Upright is an interested person and appealed the Planning Director's decision on March 27, 2024. Appellants Ted and Michelle Raszka are interested persons and appealed the Planning Director's decision on March 29, 2024. The appeals are timely.

3. Under MCC 17.119.150, on appeal of the Planning Director's decision, the hearings officer shall conduct a *de novo* public hearing on the decision. The hearings officer may hear and decide the matter.
4. Under MCC 17.119.020, a conditional use application may only be filed by certain people, including the owner of the property subject to the application. A deed recorded in the county records at Reel 1706, Page 497 shows the Joy M. Blackman Revocable Living Trust owns the subject property. The application was filed by appropriate persons. MCC 17.119.020 is satisfied.
5. Under MCC 17.119.025, a conditional use application shall include signatures of certain people, including all owners of the subject property. Joy Blackman, Trustee of the Joy M. Blackman Revocable Living Trust owns the subject property and signed the application. MCC 17.119.025 is satisfied.
6. Under MCC 17.119.070, before granting a conditional use, the director, planning commission or hearings officer shall determine:
  - A. That it has the power to grant the conditional use;
  - B. That such conditional use, as described by the applicant, will be in harmony with the purpose and intent of the zone;
  - C. That any condition imposed is necessary for the public health, safety, or welfare, or to protect the health or safety of persons working or residing in the area, or for the protection of property or improvements in the neighborhood.
7. Under MCC 17.119.030, the hearings officer may hear and decide only those applications for conditional uses listed in MCC title 17. In the conditional use application "request" section, Applicant states a request to place a non-farm dwelling.
8. MCC 17.137.050 provides for Conditional Uses in a Special Agriculture Zone. MCC 17.137.050(A) includes a single-family dwelling or mobile home not in conjunction with farm uses, subject to the criteria and standards in MCC 17.137.060(B), 17.137.070, and MCC 17.137.100. Applicant's application is for a single-family, nonfarm dwelling on the subject property.
9. MCC Chapter 17.110 is the Marion County Rural Zoning Code. Its purpose is to provide and coordinate regulations governing the development and use of lands in the portions of Marion County outside acknowledged urban growth boundaries that implement and conform to the County Comprehensive Plan. Its purpose is also to promote and protect the public health, safety and general welfare. MCC 17.110.003(A)(B).
10. MCC 17.110.800 *Dwellings and all other buildings to be accessible to public street* provides:

*Every dwelling shall be situated on a lot having direct access by abutting upon a public street or a pre-existing private driveway of a width not less than 20 feet. A private drive shall not serve more than four dwellings until unless the parcels, on which those units are proposed to be placed were established with the approval of Marion County in accordance with State law and Marion County ordinance prior to May 1, 1977, or were approved under ORS Chapter 17.121 MCC Planned Development.*

Marion County has interpreted MCC 17.110.800 to allow a property that has frontage on a public street not to be considered to be “served” by the private drive. In this case, because Lot 2000 abuts a public street, Applicant argues that the private drive, Little Haven Lane, only serves the three dwellings that do not abut a public road. That is, the Application is not limited by MCC 17.110.800.

Appellants and Opponents argue that the only “direct access” for the homes on Little Haven Lane (Tax Lots 2000, 2300, 2301, and 2302) is through Little Haven Lane. Appellants argue that the express language of MCC 17.110.800 prohibits a private drive from servicing more than four homes.

Applicant and Planning’s interpretation of the provision relies on the language “*having direct access by abutting upon a public street or a pre-existing private driveway.*” Planning’s interpretation is not unreasonable if the frontage to the public street could provide direct access. However, the more reasonable interpretation of MCC 17.110.800 is that dwellings must be situated on a lot having direct access to the abutting public street that actually permits access or a pre-existing private driveway. (emphasis added) The public street abutting the lot must be capable of providing direct access to the lot. This interpretation is consistent with Ms. Upright’s experience with Planning in seeking to partition her property to add another dwelling.

In this case, the only access to the dwelling on Tax Lot 2000 is exclusively Little Haven Lane. Although Tax Lot 2000 abuts Viewcrest, a public street, Tax Lot 2000 does not have “direct access” to the public street. Tax Lot 200 has never used Viewcrest for direct access and is exclusively served by a private drive, Little Haven Lane.

Exhibit 5 is a Restated Roadway Access and Easement Agreement for Little Haven Lane. The parties to the agreement include Ms. Upright, the Vidras, the Raszkas, and the Harts, who resided at 3298 Little Haven Lane, the property now owned by Dan and Lois Gorrell. These are the parties who use the easement to access their properties and are responsible for maintenance of the easement/private drive/ Little Haven Lane.

Little Haven Lane currently serves four homes and if another dwelling was established, the private drive would serve more than four dwellings which is prohibited by MCC 17.110.800

9. MCC 17.137.010 provides the SA purpose statement:

*The SA (special agriculture) zone is applied in areas characterized by small farm operations or areas with a mixture of good and poor farm soils where the existing land use pattern is a mixture of large and small farm units and some acreage homesites. The farm operations range widely in size and include grazing of livestock, orchards, grains and grasses, Christmas trees and specialty crops. The range in size of management units present no significant conflicts and allow optimum resource production from areas with variable terrain and soils. It is not deemed practical or necessary to the continuation of the commercial agricultural enterprise that contiguous ownerships be consolidated into large parcels suitable for large scale management. Subdivision and planned developments, however, are not consistent with the purpose of this zone and are prohibited.*

*This zone allows the flexibility in management needed to obtain maximum resource production from these lands. It emphasizes farm use but forest use is allowed and protected from conflicts. The SA zone is intended to be applied in areas designated special agriculture in the Marion County Comprehensive Plan.*

*The SA zone retains Class I through IV soils in commercial farm units comparable to those in the vicinity or in small scale or specialty commercial farms where the land is especially suited for such farming. The SA zone is intended to be a farm zone consistent with ORS 215.283.*

10. The following code, 17.137.060(A), applies to all conditional uses in the SA zone:

*1. The use will not force a significant change in, or significantly increase the cost of, accepted farm or forest practices on surrounding lands devoted to farm or forest use. Land devoted to farm or forest use does not include farm or forest use on lots or parcels upon which a non-farm or non-forest dwelling has been approved and established, in exception areas approved under ORS 197.732, or in an acknowledged urban growth boundary.*

The access to, and location of, the proposed dwelling will cluster it with adjacent rural residential uses. The 130-foot setback from the northern property line will create a buffer between the proposed dwelling and the stand of timber to the north. The access to the subject parcel is achieved through an existing, although undeveloped, easement extending Little Haven Ln S across AR zoned parcels with dwellings. There are no adjacent agricultural uses that could be disturbed by the proposed placement of a non-farm dwelling.

A farm/forest declaratory statement will be a condition of approval to ensure the property owner, and future owners, of the subject parcel are aware that the priority of the SA zone is agricultural and/or timber uses, and that owners and inhabitants of the proposed non-farm dwelling shall not infringe, inhibit, or complain about the effects of these uses on the subject dwelling.

Most of the lands surrounding the subject property are not devoted to farm or forest use. With respect to the parcels to the south and southwest that by be considered to be devoted to some type of resource use, the topography of the area is such that it is unlikely that there is any accepted farm or forest practices that would occur adjacent to the subject property. One additional dwelling in the area would not have a significant effect that any of the other residences may have had on the farming and forest uses in the area.

The use of the subject parcel for siting a non-farm dwelling using the existing easement to access the proposed building area with the modified setbacks of 130-feet to the north and 100-feet to the east, west, and south, will not cause change in, or significantly increase the cost of, farm or forest uses on surrounding parcels in the area. The criterion is met.

*2. Adequate fire protection and other rural services are, or will be, available when the use is established.*

Applicant states that the subject parcel is within the Salem Suburban Fire District and the Marion County Sheriff's Department. Appellants state that Applicant has not provided evidence upon which it could be determined if obtaining fire access from the fire district is feasible. Salem Fire Department commented that fire department access and water supply will be required prior to development. The subject property is served by the Salem Suburban Fire District. Additional findings to support a determination that "adequate" fire protection could be provided. Development of the site requires fire access from the fire department, and the criteria could be met if fire department access and water supply is established.

Applicant states that the subject parcel will have a well, septic, and electrical service on the subject property. Electrical service, provided by PGE, is available on Little Haven Ln S and could be extended via the undeveloped easement that travels over parcels 083W07A002000, 083W07A002301, and 083W07A002300 to the subject parcel. Permits for a well will need to be filed for with the Oregon Water Resources Department. Permits related to a septic system will

need to be filed with Marion County Septic Division. All required rural services may be attained for the proposed dwelling to be established. The criterion is met.

Permitting will address the factual issues raised by the Appellants.

*3. The use will not have a significant adverse impact on watersheds, groundwater, fish and wildlife habitat, soil and slope stability, air and water quality.*

The Applicant states that most of the parcel will be left wooded because harvesting the timber on this property is cost-prohibitive due to the slopes present. Development of access, and fuel breaks will require some timber be harvested. Due to those geohazards on this property, the site of the proposed dwelling is limited to an area in the middle northern section of the property. Staff has stated that siting the proposed dwelling on this area of the property is not expected to have any deleterious effect on the soils or slope stability.

The subject parcel is not within the Big Game Overlay. This property is within the Sensitive Groundwater Overlay and a Declaratory Statement acknowledging this will be a condition of approval. The criterion may be met with respect to the proposed dwelling site itself. However, the inquiry must also address the fact that the use requires a significant extension to the access road easement. The extension will require significant land clearing and slope regrading through a significant landslide area as supported by Exhibit 3, Map Pages 3-4.

The Application is for placement of a non-farm dwelling. Appellants argue that the improvements necessary for the use does not meet the criteria because Applicant has not addressed the fact that the use requires constructing adequate vehicle access through a significant landslide area. Appellant argues that slope stability concerns must be addressed before a determination of whether the criteria is met.

However, Marion County Building Inspection commented that depending upon site conditions, a geotechnical assessment of soils and slopes for adequate support of the home may be required during plan review. This would include access to the home, and the criteria could be met. Tree removal and site grading within the steep slope area will require a Geological Hazard Overlay Permit. Concerns regarding potential slope stability issues can be addressed through the permit process. This criterion is met.

*4. Any noise associated with the use will not have a significant adverse impact on nearby land uses.*

Any noise associated with the proposed development, post-construction, will be the normal noise of a dwelling in residential use. Based on the proposed site, the nearest dwellings will be over 500 feet away and shielded by trees. Any noise created by this dwelling will not have an adverse impact on the nearby land uses. The criterion is met.

*5. The use will not have a significant adverse impact on potential water impoundments identified in the Comprehensive Plan, and not create significant conflicts with operations included in the Comprehensive Plan inventory of significant mineral and aggregate sites.*

There are no water impoundments on or near the subject property, nor are there any aggregate sites in the surrounding area. The criterion does not apply.

9. Non-farm dwellings are subject to MCC Section 17.137.050(A). One of the requirements is that the proposed dwelling meet the provisions listed in 17.137.060(B), which reads as follows:

*B. Non-Farm Dwellings. The following additional criteria apply to non-farm dwelling requests:*

*1. The dwelling will be sited on a lot or parcel that is predominantly composed of Class IV through Class VIII soils that would not, when irrigated, be classified as prime, unique, Class I or Class II soils. Soils classifications shall be those of the Soil Conservation Service in its most recent publication, unless evidence is submitted as required in MCC 17.136.130.*

Marion County Soils Analysis, based on NRCS (Natural Resources Conservation Service) soil data, reports that the subject parcel is composed of 52.9% non-high value soils consisting of respectively 38.6% NeE (Nekia silty clay loam with 20%-30% slopes) which is a Class IV soil and 14.3% NeF (Nekia silty clay loam with 30%-50% slopes) which is a Class VI soil. Nekia silty clay loam classifications with slopes above 20% are not listed on the NRCS table of high value soils when irrigated in Marion County. The criterion is met.

*2. The dwelling will be sited on a lot or parcel that does not currently contain a dwelling and was created before January 1, 1993. The boundary of the lot or parcel cannot be changed after November 4, 1993, in any way that enables the lot or parcel to meet the criteria for non-farm dwelling.*

The parcel was created by partition (MJP78-078) in 1978 to legitimize the description of the property as conveyed in a deed recorded earlier the same year on Reel 111 Page 1041 of the Marion County Book of Land Records and has existed in this configuration ever since then. The property does not contain a dwelling. The criterion is met.

*3. The dwelling will not materially alter the stability of the overall land use pattern of the area. In making this determination the cumulative impact of possible new non-farm dwellings on other lots or parcels in the area similarly situated shall be considered. To address this standard, the following information shall be provided:*

*(a) Identify a study area for the cumulative impact analysis. The study area shall include at least 2,000 acres or a smaller area not less than 1,000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other, adjacent agricultural areas. Findings shall describe the study area, its boundaries, the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or non-resource uses shall not be included in the study area:*

The applicant provided a study area encompassing 2,000-acres of surrounding land. This study area included only properties zoned for Farm Use. Lands zoned for rural residential or other non-resource uses were excluded. Information supplied by the applicant, and verified by planning staff, indicates that there is no non-resource zoned land applied to the study area and that the Applicant's report meets the required area for resource zone analysis.

The applicant has indicated this study area is representative of the land use pattern surrounding the subject parcel. Uses within the study area include rural residences, timber lots, natural woods, Christmas tree lots, and fields of row crops. Staff concludes that the area presented by the applicant is a fair representation of the surrounding area and is sufficient to arrive at a sampling of the land use pattern.

*(b) Identify within the study area the broad types of farm uses (irrigated or non-irrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm dwellings that could be approved under MCC 17.136.050(A), including identification of predominant soil classifications and parcels created prior to January 1, 1993. The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible non-farm dwellings under this provision;*

The subject parcel is within an area near the edge of the City of Salem UGB, an area which contains several large tracts of Acreage Residential zoned parcels. As a result, the 2,000-acre study area creates a meandering shape that wraps around these tracts and extends around and above peninsulas of residential-neighborhoods. The largest contiguous space of the study area exists in the southern half.

The Applicant noted that due to the steep slopes and low value soil, most of the parcels included in the 2,000-acre study area have woodlots and are not in agricultural use. Based on Marion County aerial photographs of the region, very few of the woodlots appear to be intentionally planted stands of timber. One of the stands is directly north adjacent to the subject parcel. South adjacent is a clearcut that occurred between 2021 and 2023. Southwest adjacent of the subject parcel was a clear cut from between 2016-2019 that has been replanted. It is unclear from aerial photographs if this parcel has been replanted with timber or with Christmas trees. Roughly half of the wooded areas within the study area are covered with deciduous trees and irregularly growing evergreen trees. These naturally wooded areas are not considered to be in timber use. The largest stands of timber range from 10-15 acres and are on properties that contain dwellings.

The most common agricultural use in the study area appears to be for the purpose of harvesting Christmas trees. The largest Christmas tree operation in the area is only partially within the study area. The entire operation consists of approximately 60-acres of Christmas trees planted across 3-parcels which total over 200-acres. This operation is on the southernmost edge of this 2000-acre study, and less than half of the total operation is within the study area.

The largest single parcel in agricultural use is also on the southernmost edge of the 2000-acre study. This parcel is almost 200-acres and has 127-acres devoted to grass seed or hay production, and 20-acres devoted to Christmas trees. It is worth noting that a few acres of the Christmas tree lot falls outside of the study area. The other two large parcels in agricultural use are both on the northernmost edge of the 2000-acre study area. These parcels are contiguous and along the Willamette River north of Illahe. One is 97-acres, and the other is 182-acres, both appear in use for row crops. The northernmost parts of the 182-acre parcel falls outside of the study area.

A total of 137 parcels were included in the study area. Of these included parcels, 124 are zoned SA and 13 are zoned EFU. Only five parcels in the study area are larger than the minimum 80-acres for SA and EFU zoned parcels. 60% of the parcels are under 10-acres in size.

Of the parcels included in the study area, 92 have at least one dwelling and there are a total of 101 dwellings on these 92 parcels. 84 of those parcels had a dwelling prior to 1993. A total of 8 parcels have been developed with homesites in the last 30 years. Since

1993, four non-farm dwellings have been approved within the study area. Three of these were approved in the 90s, and the fourth in 2004. Also, since 1993, three lot of record dwellings were approved, and three replacement dwellings were approved. While not permanent, four hardship dwellings have been approved in the study area since 1993.

Seven parcels within the study area that have neither a dwelling nor predominantly high value soils. These parcels would therefore potentially be able to qualify for additional non-farm dwellings. However, five of these parcels were involved in Measure 37/49 claims. As a result, these parcels would develop single family dwellings as a result of their Measure 49 decisions, and not through application for non-farm dwellings. A total of seven dwellings may result from these Measure 49 orders. The remaining two parcels that could potentially qualify for non-farm dwellings are both of relatively large sizes and in timber use.

The Applicant contends that the most common use of parcels within the study area is for rural residential purposes, and that allowing development of a single-family dwelling on the subject parcel would not destabilize the less common farm and timber uses in the area. The commercial agricultural uses within the study area are restricted to the northern and southern most parcels, all three of these operations are 0.7-0.9 miles from the subject parcel on the other side of rural residential clusters. The proposed dwelling would be consistent with the development pattern that has occurred on the SA and EFU parcels surrounding the subject parcel.

*(c) Determine whether approval of the proposed non-farm dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase, or lease farmland, or acquire waste rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.*

Approval of this application would bring the total number of post-1993 non-farm dwellings within the study area to five. The subject parcel is 5.97-acres and would fit within the current land use pattern of small acreage homesites scattered through the area. The subject parcel has never had a dwelling not been involved in agricultural use.

If the other two parcels that could potentially develop non-farm dwelling were able to do so, they would not be able to materially alter the land-use pattern in the area. The dominant land-use pattern in this area is for rural residential use and has been for more than 30 years.

The proposed dwelling would be built within an existing cluster of residences, accessed on private lane that serves adjacent AR zoned parcels. The proposed dwelling site would be shielded by trees and topography from adjacent SA zoned parcels. These adjacent parcels while involved in timber use, do not appear to be involved in agricultural uses. The access and isolation of the proposed dwelling shield it from the scattered agricultural use of Christmas tree production in the area. The parcels in the study area involved in row crop production are all on the other side of residential neighborhoods from the subject parcel, so it is unreasonable to say that the proposed dwelling will have any effect on those farming operations. The proposed dwelling will not make it more difficult for the few existing farming activities to continue and would not materially alter the land use stability of the area. The criterion of MCC 17.137.060(B)(3) are met.

10. In addition, non-farm dwellings shall be subject to the following code as provided for in 17.137.070, Non-farm dwelling requirements:

(A) *Special Setbacks.*

*1. Dwellings. A special dwelling setback of 200 feet from any abutting parcel in farm use or timber production is required.*

*2. Accessory Buildings. A special setback of 100 feet is required for buildings accessory to a dwelling from any abutting parcel in farm use or timber production.*

*3. Adjustments. The special setbacks in subsections (A)(1) and (2) of this section may be reduced if it is determined, concurrently with any land use application or as provided in Chapter 17.116 MCC, that a lesser setback will meet the following review criteria for alternative sites:*

*a. The site will have the least impact on nearby or adjoining forest or agricultural lands.*

*b. The site ensures that adverse impacts on forest operations and accepted farming practices on the tract will be minimized.*

*c. The amount of agricultural and forestlands used to site access roads, service corridors, the dwelling and structures is minimized.*

*d. The risks associated with wildfire are minimized.*

Applicant proposes reducing the setbacks from 200-feet to 100-feet considering the dimensions of the property (an imperfect square of approximately 500 by 500-feet) and the significant slopes which create geohazard areas across much of the eastern, western, and southern sides of the parcel. The most reasonable buildable area is the middle of the northernmost third of the parcel. This area is closest to where the easement enters the property and is the flattest area, though still within the geohazard 2-point overlay. This site would put the proposed dwelling potentially 100-feet from the timber lot directly north-adjacent to the subject property. The applicant would have to sign a farm/forest declaratory statement as a condition of approval, in which they would recognize these timber uses are a priority above a non-farm dwelling in this zone and shall not be interfered with or complained about.

The proposed location would allow for the existing easement to be used, which would travel over AR zoned land that is not being used for agricultural or timber purposes. The subject parcel is served by the Salem Suburban Fire District and will comply with all relevant fire district code imposed by the SSFD.

It is generally considered prudent to have 2-acres to be able to site a dwelling, septic tank and drainfield, replacement drainfield area, and a well. If the 200-foot setbacks were imposed, the practical buildable area would be roughly a quarter of an acre. The buildable area increases to almost 1-acre with the proposed 100-foot setbacks. The prohibitive geohazard slopes present on the eastern, western, and southern portions of this property make the northern setback the primary variable in potentially developable space on this parcel.

The northern parcel has a 10-acre stand of timber directly adjacent to the subject parcel. Depending on how the Applicant would implement the fuel breaks imposed by 17.137.070(B),

the effective setback from the northern parcel will end up being at least 130-feet. The primary safety zone is 30 feet around all structures, with some slope related extensions that may affect this property depending on the siting of the proposed dwelling. The secondary fuel break area is 100-feet around the primary safety zone. The secondary fuel break area requires pruned and spaced vegetation so that fire would not spread between the crowns of trees, or between trees via vegetation between them.

To reduce the setback on the northern parcel below 130ft would conflict with the criteria of 17.137.070(A)(3)(d) and 17.137.070(B)(3) due to the requirements to meet the primary and secondary fuel break areas.

A reduced special setback of 130-feet from the northern property line, and 100-feet from the western and southern property lines for the proposed dwelling and any future accessory structures would maintain the intent of the Special Setback Code and meet the criteria in subsection (A)(3)(a-d). The special setbacks do not apply to the eastern property line adjacent to parcels in the AR zone. These criteria are met.

*4. The special setback in subsection (A)(1) of this section shall not be applied in a manner that prohibits dwellings approved pursuant to ORS 195.300 through 195.336 nor should the special setback in subsection (A)(1) of this section prohibit a claimant's application for homesites under ORS 195.300 through 195.336.*

The proposed dwelling is not subject to/a part of a Measure 37 or 49 claim. The criterion does not apply.

*(B) Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to provide continuing fire hazard management in accordance with Chapter 3 of "Fire Safety Consideration for Development in Forested Area," 1978, and any revisions thereto.*

The updated version of the standards within the document above is referenced in the EFU-equivalent of this section of code: 17.136.070 (B). "Fire Hazard Reduction. As a condition of approval for any non-farm dwelling located closer than 200-feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry."

The property north of the subject parcel has approximately 10-acres devoted to timber production directly adjacent to the subject parcel. The primary and secondary fuel-free break areas shall be conditions of approval. The criterion is met.

*(C) Prior to issuance of any residential building permit for an approved non-farm dwelling under MCC 17.136.050(A), evidence shall be provided that the county assessor has disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.113 or 308A.724 or 321.359(1)(b), 321.842(1)(A) and 321.716. A parcel that has been disqualified under this section shall not requalify for special assessment unless, when combined with another contiguous parcel, it constitutes a qualifying parcel.*

The criterion can be met with a condition of approval: the applicant shall submit evidence to Marion County Planning that the property has been disqualified from farm/forest

deferral by the Marion County Tax Assessor's Office prior to Planning approval of a building permit. The criterion is met.

11. Non-farm dwellings must also meet the standards in MCC 17.137.100, which are listed below:

(A) *Maximum Height.*

1. *Dwellings: 35 feet.*
2. *Farm-related structures on farm parcels: none.*
3. *Nonresidential and non-farm structures: 35 feet unless they are in conjunction with conditional uses allowed in MCC 17.137.050, and a greater height is requested and approved as part of the conditional use permit.*

Compliance with this shall be verified at the time of building permits. The criteria can be met.

(B) *Minimum Setbacks. Except as required in MCC 17.137.070(A), the following setback requirements shall*

*be implemented for all new structures other than farm-exempt buildings, signs and fences:*

1. *Rear Yard. A minimum of 20 feet.*
2. *Side Yard. A minimum of 20 feet, except for lots or parcels of one-half acre or smaller created prior to January 1, 1994, in which case the side yard setback shall be five feet.*
3. *Front Yard. A minimum of 20 feet. When by ordinance a greater setback or a front yard of greater depth is required than specified in this section, then such greater setback line or front yard depth shall apply (See Chapter 17.112 MCC).*

The dwelling and any future accessory structures shall be subject to MCC 17.137.070(A), as adjusted in the conditions of approval. Therefore, these criteria do not apply.

(C) *Declaratory Statement. For all dwellings, and other uses deemed appropriate, the property owner shall be required to sign and allow the entering of the following declaratory statement into the chain of title of the lot(s) or parcel(s):*

*"The property herein described is situated in or near a farm or forest zone or area in Marion County, Oregon, where the intent is to encourage, and minimize conflicts with, farm and forest use. Specifically, residents, property owners and visitors may be subjected to common, customary and accepted farm or forest management practices conducted in accordance with federal and state laws that ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantors, including their heirs, assigns and lessees do hereby accept the potential impacts from farm and forest practices as normal and necessary and part of the risk of establishing a dwelling, structure or use in this area, and acknowledge the need to avoid activities that conflict with nearby farm and forest uses and practices, grantors will not pursue a claim for relief or course of action alleging injury from farming or forest practice for which no action is allowed under ORS 30.936 or 30.937."*

A declaratory statement could be made as a condition of approval. The criteria could be met.

If MCC 17.110.800 did not restrict the approval of the application, the following conditions would have been imposed and must have been met before a building permit could be obtained. The following conditions should be imposed if a variance is obtained:

1. The applicant shall obtain approval for all permits, including subsurface sewage, as required by the Marion County Building Inspection Division.
2. The proposed dwelling and any future accessory structures shall maintain a 130-foot minimum setback from the northern property line and a 100-foot minimum setback from the western and southern property lines.
3. Prior to obtaining building permits, the applicant must provide evidence to the Planning Director that the county Assessor's Office has permanently disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that the additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.113 or ORS 308A.724 or ORS 321.359(1)(b), ORS 321.842(1)(A) and 321.716.
4. Prior to issuance of a building permit for the new dwelling, the applicants shall sign and submit a Farm/Forest & SGO & Geohazard Declaratory Statement to the Planning Division. This Statement shall be recorded by the applicant with the Marion County Clerk after it has been reviewed and signed by the Planning Director.
5. As a condition of approval for any non-farm dwelling located closer than 200 feet to timber, the owner shall be required to maintain a primary and secondary fuel-free break area in accordance with the provision in "Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads" dated March 1, 1991, and published by the Oregon Department of Forestry.
6. The dwelling shall be addressed 3308 Little Haven Ln S, effective when building permits are applied for. This address is subject to change if the driveway location changes.

#### **VII. ORDER**

It is hereby found that Applicant has not met the burden of proving applicable standards and criteria for approval of a conditional use application for a non-farm dwelling because the private drive that would be used to serve the proposed dwelling already serves four dwelling units.

#### **IX. Appeal Rights**

An appeal of this decision may be taken by anyone aggrieved or affected by this Order. An appeal must be filed with the Marion County Clerk (555 Court Street NE, Salem, Oregon) by 5:00 on the 14th day of August, 2024. The appeal must be in writing, must be filed in duplicate, must be accompanied by a payment of \$500.00, and must state wherein this Order fails to conform to the provisions of the applicable code provision(s). If the Board denies the appeal, \$300.00 of the appeal fee will be refunded.

DATED this 30<sup>th</sup> day of July, 2024.
