DON'T FLUSH ISAPPEAR

Everything that gets flushed down the drain doesn't just disappear, it needs proper treatment to protect you and our environment. When trash is flushed as well, it harms the treatment process and creates issues when it comes to disposal. Help keep our system working the way it should by making sure trash ends up in the proper receptacle - not in the toilet.

PLEASE DON'T FLUSH THESE ITEMS EVEN IF THE LABEL SAYS IT'S FLUSHABLE
